ORCHARDS, VINEYARDS, AND BERRY FIELDS PLANTED WITH BOUNTIFUL RIDGE GROWN TREES
AND PLANTS TYIFY THE HORN OF PLENTY

REDWIN

U. S. Plant Patent No. 1661

World's Earliest Peach with outstanding size and color. Most nearly resembles parent Erly-Red-Fre but ripens 3 weeks earlier. See full description and prices in general peach section.

We are one of the East's largest Nurseries . . . Specializing in Fruit Trees and Berry Plants . . . Selling Direct to the Planters for more than 80 years . . . through four generations of the Kemp family.

"Bountiful Strain IMPROVED WINESAP"

The Famous WINESAP APPLE Glorified in this beautiful, large size, selected strain.

The New DEVOE PEAR

U.S. Plant Patent No. 728

Resistance to blight, large size, beautiful color, high quality, make Devoe a popular variety for home and commercial planting.

FOR GREATER PROFITS AND SATISFACTION

Plant Bountiful Ridge Grown Trees and Plants
"PLAN TO PLANT THIS YEAR"

POCAHONTAS

The outstanding kind, both for commercial and home garden production. VIRUS FREE POCAHONTAS grown the BOUNTIFUL RIDGE WAY are beautiful, vigorous, delicious, and heavy yielders.

Our 3-Point Guarantee

1. ALL STOCK GUARANTEED TO ARRIVE IN A-1 CONDITION. All Truck Freight, Express and Parcel Post shipments are insured. Notify us and the carrier at once of damage and claims will be filed for losses. Duplicate orders for damaged stock will be shipped at once.
2. ALL STOCK GUARANTEED TRUE-TO-NAME. Every precaution is taken to insure trueness-to-name. Any plants proving not so will be replaced at no charge or purchase price refunded. Further than this, we are not responsible.
3. ALL STOCK IS GUARANTEED TO START TO GROW providing our planting instructions are followed and normal care is given. Should any plant fail to do this, notify us direct by July 1st and replacements will be sent the following season without charge. After this date, we will replace unsatisfactory plants at one-half purchase price. You pay transportation on all replacements. This guarantee covers all normal losses. Heavy and unusual losses due to conditions beyond our control will be settled satisfactorily with the customer.

REDWIN

U. S. Plant Patent No. 1661

Patented, Grown and Sold Only by
Bountiful Ridge Nurseries

The Fruit Is:

Large Size
White Flesh
Highly Colored
Finest Quality
Disease Resistant
Good Shipper
A Money Maker

The Tree Is:

Thrifty Grower
Disease Resistant
Hardy In Wood
Hardy In Bud
Early Bearer
Heavy Producer
Self Fertile

Pictures of mature Redwin (center), Cardinal (left), and Dixired (right).
Showing comparative size and season of ripening.

"Win With Redwin"

We continue to hear how Redwin makes money. Just 60 days from bloom to harvest. Redwin has good size, color, flavor, and productivity. Tree characteristics are good. It is a white fleshed, semi-cling best adapted to local and nearby markets. Ripening season is about 3 weeks earlier than Erly-Red-Fre.

PRICES LISTED BELOW ARE FOR REDWIN PEACH TREES ONLY

	Each	3 to 9	10 to 49	50 to 99	100 or more

SUNSHINE

(U. S. Plant Patent Applied For)

The original Sunshine Peach and sport limb as compared to a Red Haven sample.

We have a nice supply of dormant budded, 1 yr., trees of SUNSHINE for this planting season. Prices are same as for Dawne . . . See Page 5.

SUNSHINE is a brilliant new budspout of Red Haven. It ripens 5 or more days earlier than Red Haven and exhibits the same fine color characteristics of its parent.

The flesh is a clear yellow sparsely flecked with red streaks, is melting, of good flavor and resists browning. Sunshine is a TRUE FREESTONE, even when hard ripe, making it far superior to Red Haven in this respect. Fruit size is equal to, or larger than, that of Red Haven on trees of comparable age.

Trees of Sunshine are vigorous, somewhat resistant to disease, upright in growth, and begin bearing at an early age with heavy crops. Buds and wood seem to be equally as hardy as the parent. Hours of chilling needed to break dormancy are about the same as Red Haven.

SUNSHINE originated in the orchard of John Errera, Hammondton, N. J., as a budspout of a Red Haven tree. The first fruit was so much earlier and of such outstanding beauty that Mr. Errera was attracted to it. He brought it to our attention, and after thorough testing, we have found Sunshine worthy of introduction to the public. We are sure that you will want to try some trees of this fine new variety this year.

Bountiful Ridge Continues . . .

Its Parade of Exclusives!

DAWNE

U. S. Plant Patent 1955

THE WORLD'S EARLIEST YELLOW FREESTONE PEACH

This is a picture of ripe Dawne peaches. Note the good size and shape. Picture is $\frac{3}{4}$ actual size.

FACTS ABOUT DAWNE

COLOR—Dawne has that beautiful red blush that almost completely covers a golden yellow ground color. This fine color comes about 10 days before the fruits are ripe, allowing picking in time for distant markets.

SIZE—Dawne sizes up well on older trees. The tree loads up to such an extent that thinning is a necessity almost every year. The fruits of well grown Dawne will pack $2\frac{1}{4}$ inches up in any normal year.

ORIGIN—Dawne originated in Carbon County, Pa., as a chance seedling at the home of Mr. J. R. Stettler. It was so early and of such good size and flavor that Mr. Stettler was attracted to it. After testing it for several years we believe that it is truly valuable to the fruit industry and we are pleased to introduce it to our customers.

FLAVOR—The flavor of Dawne is the most outstanding and pleasing of any early peach that we have ever tasted. It is sweet, sub-acid, melting and juicy. Dawne is equally good when eaten from the tree, sliced with sugar, canned, frozen, or used in ice cream.

VIGOR—The trees of Dawne are vigorous, upright to spreading in growth. The buds and wood are hardy to severe winter temperature and spring frosts.

BEARING AGE—Dawne bears early, having fruits the second year after planting. Good crops have nearly always been recorded in the third year. The blossoms are showy, self-fertile, and hardy.

TIME OF RIPENING—Dawne ripens about 10 days after Redwin and 8 to 10 days before Erly-Red-Fre. This is well in advance of its nearest competitor and at a time when extra high color and quality will bring the most money.

PRICES ARE FOR DAWNE TREES ONLY

NOTE

Ripening order of varieties designated by bracketed numbers after name. Varieties overlapping in ripening season indicated by sub-letter. Example: Elberta and Hale are about same season and are designated by numbers 11a and 11b.

MARCUS (1) A new introduction from North Carolina which ripens about with Mayflower and Redwin. It is yellow fleshed, clingstone, with a yellow skin blushed red on one side. Shipping quality seems fair and it should be tried throughout the Southern areas. Marcus is a seedling of Ely-Red-Fre.

REDWIN (1a) See page 4 for full description & prices.

DAWNE (2) See page 5 for full description. Also see outside back cover for color illustration.

EARLIRE (2a) Earlired is a cross of Redhaven made at Beltsville, Md. It ripens 2 to 5 days earlier than Cardinal and completes harvest before Sunhaven. The fruit is medium sized, has very light pubescence, and is covered with a bright red blush over a yellow ground when mature.

The flesh is yellow, firm and of good flavor a cling when firm ripe and semi-free when full ripe. The fruit is of fine shape for the Carolinas and northward.

Trees are vigorous and dependable in productiveness, moderately susceptible to bacterial spot. Fruits need early and heavy thinning for best size.

HILAND (2b) A highly colored, yellow clingstone peach. Ripens just before Cardinal. Buds require about 750 hours chilling. Vigorous and productive. Fruits medium size, light pubescence, attractively colored, with light red blush at shipping time. Flesh fairly firm and of good flavor. Recommended for areas of low chilling requirement.

Another Bountiful Ridge First

SPECIAL TREATMENT MAKES OUR PEACH TREES "BETTER THAN EVER"

At No Extra Cost To You

For the first time in the history of the nursery industry, Bountiful Ridge is pleased to offer "At No Extra Cost," peach trees grown from budwood that has been heat treated to insure its "Freedom From Virus Disease." Our trees are being grown many miles from any known source of little peach, peach yellows, red suture, or X-disease and, because of this isolation, are "essentially virus free."

We believe that our "essentially virus free" peach trees will give you, Mr. Planter, the best stock that money can buy. Combine this new practice with our regular propagating procedures—selected budwood, hardy and disease resistant rootstocks, specially treated soils, continuous inspection, rigid storage control—and you have the best peach trees for any use that it is possible to produce. All of our peach trees, both dwarf and standard size, have been so treated. It will not, therefore, be necessary to note your wish for Virus Free trees on your order.

MAYGOLD (2c) A highly colored cling needing only 650 chilling hours. Fruit is medium size yellow fleshed with good flavor. A light red blush covers about half the skin over a yellow ground. Trees are vigorous and productive. Maygold ripens with Redcap and is recommended for areas where temperatures averaging below 54 degrees may be expected.

REDCAP (2d) Ripens just before Dixired and resembles Dixired very much. A clingstone, medium size, round, with light pubescence, attractive red blush covers most of the peach. The flesh is yellow, firm but melting and good flavor. Trees are moderately vigorous and productive. Buds require 750 hours chilling. This variety should prove especially valuable where short rest periods are a factor.

CARDINAL (2e) Ripens four days ahead of Dixired. Fruits are clingstone, medium size, round, light pubescence. Well covered with attractive red blush over yellow ground. Flesh is yellow, firm and good flavor. Chilling requirements about 900 hours.

Dear Sir:

This spring I purchased from your nursery a few fruit trees and raspberries. The trees are doing fine—very well pleased with them.

July 5, 1963

Mr. Burt C. Welcomme
New Bloomfield, Pa.

Proper variety selections will lead to greater profits.

DIXIRED (2f) Dixired is a clingstone, medium size, round with light pubescence. About three-fourths of the surface is covered with a bright attractive red blush. Flesh is yellow, firm but melting and of good flavor. The outstanding characteristics of Dixired are its unusual firmness and slow rate of softening for an early peach, plus an attractive appearance. The fruit acquires color long before it is ready to pick. Dixired is recommended as an early shipping peach.

COLLINS (2g) A new, early ripening, semi-clingstone, with good color, medium size, recently introduced by N. J. Peach Council. It bears good crops, with few split pits and ripens a few days before Sunrise. Collins is not as disease resistant as many of the other varieties.

JUNE GOLD (2h)

Plant Patent 1884

(Grown and Sold under License from Patent Owner)

A large yellow freestone ripening with Maygold and just before Coronet. Fruit is highly colored and of good flavor. Size is excellent for the season. Trees are vigorous and set heavy crops. This is a California peach which shows great promise for the east. It requires about 750 chilling hours.

PRICES FOR JUNE GOLD

	Each	10-49	50 or more

ERLY-RED-FRE (3)

THE BEST EARLY WHITE PEACH

Unexcelled for Size and Quality

Growers everywhere still rave about Erly-Red-Fre more than 20 years after it was introduced. No other early peach known has been as profitable and universally adaptable. There is still a place in nearly all plantings for this fine peach.

The fruits are exceptionally large, averaging over 2 1/2" in most all cases without thinning. Color is never a problem; the fruits turning red at least on one side well before harvest date. Quality is exceptionally good. Erly-Red-Fre has long been known for its shipping and keeping quality.

Trees are very vigorous, hardy in wood and bud, and produce large annual crops. Erly-Red-Fre resists bacterial spot and bears at young age. Harvest time is about 95 days after bloom; in time to save expensive sprays and maintenance costs and therefore, increase profit.

North, South, East or West, Plant Erly-Red-Fre for Profit.

GOLDRAY (3a)

A Bud Sport of Golden Jubilee Ripening 2 Weeks Earlier

Goldray has a bright red blush on a golden yellow background. Goldray will cling to the pit when not fully ripe and has a tender skin and flesh, being more adapted to home use, road stands, and nearby markets. Trees are vigorous making a heavy set of buds which have proven as hardy as regular Jubilee resulting in very regular crops.

Mr. Kemp:

Received trees and planted them as I said in rich vegetable growing soil. Have been telling all people I meet of your terrific way of sending the plants and likewise of prompt, courteous and fair treatment. It's a pleasure to do business with you.

Santo P. Patane
Farmingdale, New York

May 16, 1963

SUNHAVEN (3b)

Matures ten days earlier than Red Haven. Fruit is large in size, nearly round and uniform in shape. Color much like Red Haven, largely bright red. Fruits keep and handle unusually well for such an early maturing variety. Flesh clear yellow, fine textured, firm, of good flavor and resistant to browning. A partial cling until fully ripe. Trees are large, vigorous, and productive. Recommended for an early fresh market variety.

OUR TREES OF SUNHAVEN ARE ALL OF THE ORIGINAL STRAIN DIRECT FROM SOUTH HAVEN, MICHIGAN.

SUNRISE (N.J. 133) (3c) This peach has been planted widely and is satisfactory as an early yellow fleshed peach, ripening before Jerseyland. Fruits are well colored, semi-free, good size and trees are resistant to bacterial spot. Fruits are firm and nicely colored. It overlaps on Goldray.

SUNSHINE (3d)

(Plant Patent Applied For)

(Read about this fine new variety on page 4)

JERSEYLAND (N.J. 135) (4)

An early, large, firm, attractive yellow-fleshed freestone, ripening a few days before the Golden Jubilee. It hangs well to the tree and is an excellent shipper. Tree is hardy, sets fruit buds freely and comes into bearing early.

CORONET (4a) Ripens just before Redhaven. The fruit is medium size, highly colored; yellow fleshed tending to stick to pit when not fully ripe but a freestone when ripe. Bright, attractive red blush over good yellow ground color. Firm, smooth textured, very good but mild flavor. Coronet trees are vigorous and productive. Blossoms are small-petaled, self-fertile, chilling requirements about 800 hours.

PLANT VIRUS FREE
STRAWBERRIES
BEST VARIETIES FOR YOUR AREA
PAGES 42-47

DIXIGEM (4b) Ripens about with Redhaven. The fruit is medium size, with a bright, attractive red blush covering about half the surface. The ground color is a bright yellow. The flesh is yellow, medium to firm, a fine texture and excellent flavor. It is almost a freestone when fully ripe.

REDHAVEN (4c)

Now A Tried and Proven Winner of Its Season

It colors a brilliant red and beautiful yellow. Skin is smooth, almost fuzzless, resembling J. H. Hale. Flesh is very firm. Tree is vigorous with heavy bud set and bears young. Fruits medium sized and well filled when ready to pick, suture being rather prominent until peach approaches picking period. Growers may be inclined to pick too early because of good color. When trees set too heavy, thinning should be practiced to increase size of the fruit.

GOLDENRED (4d)

Goldenred is a yellow freestone of high quality and attractive red color. The peach is smooth, round, and firmer than Red Haven.

The flesh is lemon-yellow, fine textured, with sweet aroma and pleasing taste, red around the pit but not bitter. Fruit ripens evenly; skin color developing early to allow picking while still firm. We recommend this fine new peach for trial in all areas where Red Haven can be grown successfully.

*Indicates Commercial varieties, with average hardiness, adapted to distant and nearby markets.

**Indicates Hardier and good Commercial varieties adapted to distant and nearby markets.

***Indicates Extremely hardy varieties of Merit.

REGINA (4e) Ripens with Red Haven. Fruit is medium sized, with very light pubescence. Surface is covered with a bright, attractive red blush over a yellow ground color. Flesh is yellow, firm, smooth textured, and of good flavor. A freestone when fully matured. Regina is more highly colored than Redhaven and does not tend to soften first on the suture and apex.

COMANCHE (4f) A Red Haven type peach that ripens about with Red Haven. Size is exceptionally good with little thinning required. Fruits are attractive, firm yellow flesh, and semi-free with no split pits. Comanche has a desirable crop load with larger size fruits than Red Haven.

CUMBERLAND (5) The tree is a vigorous grower. The fruit is attractively colored with red, oval in shape. The flesh is white, almost free. Ripens just before Jubilee. Cumberland continues to be popular in all peach sections.

GOLDEN JUBILEE (5a)

The tree is unusually hardy. The buds resist low winter temperatures better than Elberta and open later than Elberta. The blossoms are self-fertile. The peach is medium to large in size. The peach develops better if a well balanced fertilizer is used. As the tree grows older the fruit becomes firmer and develops more naturally.

GOLDGEM (N.J. 197) (5b) An attractive yellow-fleshed peach ripening with Golden Jubilee. It is firmer than Jubilee and the color is similar to Newday.

THE FAIRHAVEN PEACH (5c)

Fairhaven has the same tendency for heavy fruit set as Redhaven. Fruits of Fairhaven are medium to large, round, bright golden color with attractive red cheek.

Skin smooth and tough. Fruit firm and ships well. The flesh is medium yellow with moderate amount of red around the pit, moderately fine textured and good flavor. A freestone.

RANGER (5d) A fine looking yellow freestone peach ripening with Golden Jubilee. Medium to large size, almost round, with light pubescence, highly colored with bright red blush. Flesh yellow, medium firm, medium textured, good flavor and suitable for canning or freezing. Tree is vigorous and productive showing marked resistance to bacterial leaf spot. Blossoms medium sized, self fertile, usually open after Elberta.

KEYSTONE (6) Keystone ripens just ahead of Triogem. The fruits are large, highly colored, round light pubescence, bright golden ground color. Flesh is yellow, firm, smooth texture and of good flavor, and a freestone. Trees are vigorous and productive with less bacterial spot than Southland or Elberta. Blossoms are self fertile, require 750 chilling hours.

TRIOGEM (N.J. 70) (6a) An early, oval, red all over, firm, yellow freestone peach ripening about two days after Golden Jubilee. The trees are medium in size, hardy and heavy bearers. Trees require good soil and good culture for best results.

Triogem has fruited over a wide area and has gained popularity due to heavy yields, good marketing traits, and hardness of tree.

WASHINGTON (6b)

An outstanding new introduction from the Virginia Experiment Station. The fruit has outstanding qualities of color, size, flavor, firmness of flesh, texture, and is fully freestone. The buds are extremely resistant to spring frosts.

Washington ripens about 3 days after Triogem and 3 days before Sunhigh. It has good pollen and should be used where pollination is needed. This variety should be adapted to the central Virginia area and to the mountain sections of Maryland and northward.

COLORA PEACH (6c)

An Outstanding Hardy, Early, Yellow Freestone Peach. High Color, Superb Quality, Size and Hardiness.

Our own introduction of a frost resistant, yellow freestone peach. Trees have withstood temperatures during past winters of about 17 degrees below zero, when most other varieties were wiped out by these low temperatures. The peach is an attractive yellow, freestone, well-colored and of excellent quality, ripening just after Golden Jubilee.

NEWDAY (N.J. 79) (6d) A large, oval, yellow-fleshed peach which ripens a few days after Triogem. The tree is more vigorous and fruit larger which makes the variety somewhat easier to grow for market. The fruit is showy, firm in texture and hangs to tree well.

SUNHIGH (N.J. 82) (7) A large, red bright smooth peach, which colors well before it ripens, softens slowly, making it a good commercial peach. Flesh inclines to adhere to the pit when hard ripe, but is generally freestone. Tree is spreading in growth and dormant buds are hardy. Variety seems to do best in hilly sections and requires thorough summer spraying.

SOUTHLAND (7a)

Yellow Fleshed variety ripening in Sunhigh Season. Fruit is a freestone, medium to large size, round and has little fuzz. Color is attractive with a light-red blush covering about half the peach at shipping stage. Flesh is yellow, firm, slow softening, medium textured, good flavor. Trees are vigorous and productive, blossoms large, self fertile.

SUMMERQUEEN (N.J. 157) (7b)

A high quality, large, attractive, firm, yellow-fleshed peach ripening about with Sunhigh. Less susceptible to bacterial spot than Sunhigh. Has large, showy, imperfect blossoms which need pollination. Sets good crop with proper cross-pollination and is recommended to replace Sunhigh where bacterial spot is a problem.

LORING (8)

**A Fine Peach Showing Promise
Wide Adaptability — Many Uses
Plant Loring With Confidence**

Resembles Golden Jubilee in color and shape, however, is much firmer and does not soften at the suture or tip. A large firm yellow fleshed freestone with attractive bright color of red and yellow over a yellow ground color. Ripens about two weeks ahead of Elberta.

Our Trees of Loring are TRUE-TO-NAME

JULY ELBERTA (Burnett Elberta) (8a)

A large, medium early freestone peach ripening with Hale Haven.

The fruit has a golden yellow color, over-spread with red. It can be picked for shipping about four days before ripening due to early color. The quality is excellent for canning and fresh eating. It shows better than average results when frozen. The variety does well in all peach sections.

REDGLOBE (8b) Ripens 15 days before Elberta. Fruits large, round, with light pubescence. Skin is highly colored with red over a good yellow ground color. A freestone. Complete absence of red in the flesh makes it an outstanding canning peach. Very good quality. Chilling requirements about same as Elberta. Blossoms are large and self-fertile.

RICHHAVEN (8c)

Outstanding New Variety

Recommended For Test In All Areas

Fruits are large, uniform in size and shape. Color a bright red blush with stripes of red and gold laid over a bright golden ground color. Fuzz is unnoticeable and an unusually thick, tough skin adds to its handling and shipping ability. Flesh is a clear yellow with moderate reddening around the pit. Entirely a freestone when ripe. Ripens with Hale Haven or fourteen days before Elberta.

HALE HAVEN (8d)

One of Our Finest Peaches for "Quick Freezing."

The tree is a strong thrifty grower, resistant to common peach diseases. The fruit is large, oval shaped like a well grown J. H. Hale. It has a good tough skin. The flesh of the peach being of such texture that it will not bruise easily. A beautiful red color that attracts the buyer. A flavor that is the best.

JULY HEATH (Othello Cling) (8e)

A large white cling, ripening latter part of Hale Haven season. A beautiful peach, strong growing tree and hardy in bud. Very high in quality. We recommend this peach to anyone desiring a white cling for all purposes. Sometimes called July or Summer Cling.

GOLDEN EAST (N.J. 87) (8f) A large oval, firm, melting, highly colored, yellow-fleshed peach ripening about 15 days before Elberta. Usually a freestone. Does best on sites south of Central New Jersey where favorable elevations, soil and climate prevail. Tree is upright, spreading and vigorous. Medium in hardness.

ECLIPSE (9) A dark red, yellow-fleshed freestone peach of firm texture and good flavor. Tree is very vigorous. The fruit is oval in shape, flesh fine grained and an excellent shipper; hangs well to the tree and can be harvested over a long period.

CHAMPION (9a) We restore this variety to our list because of demand for a fine white peach in this season. The fruit is large, quite regular, yellowish-white mottled with red on sunny side; flesh white with red at pit. Very hardy. Freestone.

SUNCREST (10) Originated by USDA, ripens about 10 days earlier than Elberta, is large, round, and freestone. It has light pubescence and is covered over $\frac{2}{3}$ with a bright red blush over a yellow ground color. The flesh is yellow, firm enough for distant shipment, and of good flavor.

The trees are vigorous and productive, somewhat susceptible to bacterial spot in trouble areas. The blossoms are large petaled and self-fertile. We believe that Suncrest is worthy of trial in the eastern area.

SPECIAL NOTE

We want you to plant BOUNTIFUL RIDGE trees. Our trees are as good as can be produced. When wanting more than 300 peach trees write to us giving list and we will quote you special prices consistent with market conditions at that time.

SULLIVAN'S EARLY ELBERTA (10a)

Leads The Early Elberta Season

The tree and fruit characteristics are identical with Elberta.

It ripens ahead of the regular Early Elberta and Belle of Georgia; averages large in size, extra fine quality and shows good shipping ability.

POPPY (10b) It ripens eight days before Elberta. The fruits are large, shaped like Elberta, seems to size well with heavy crop. Poppy has attractive red color, coloring well before peach is ripe. Fruits are firm, yellow fleshed, freestone of fine texture and flavor. A good shipping peach. Its season and general characteristics are such that it should have a place in most orchards.

REDCREST (N.J. 26) (10c) A large, attractive yellow-fleshed freestone ripening about a week before Elberta. The skin color is a beautiful crimson red which resembles Sunhigh. The quality is supreme, flesh golden yellow, firm and juicy. Tree is productive and a vigorous grower. Redcrest is an airfree peach.

MADISON (10d)

A fine frost tolerant, yellow, freestone formerly tested as VPI 54. The fruit ripens 7-8 days before Elberta, is fine textured and very firm. Flavor is mild and of good quality. Color is a good, bright yellow $\frac{1}{2}$ to $\frac{3}{4}$ covered with a pretty red blush. A very attractive peach. The tree is of average vigor and produces a heavy set of fruit buds. Note: We are sold out of this variety for the 1963-64 season. Place your orders early for Fall 1964 and Spring 1965.

BLAKE (10e)

Widely planted in New Jersey and other areas, Blake seems to have grower and consumer approval. Fruits are medium to large, very highly colored with attractive red over good yellow ground color. It is a freestone, having considerable red about the pit and extending to the flesh in some cases. Flesh is very firm and of excellent flavor. Trees are good growers, ranks with Elberta in hardness of bud and tree. The size, its bright attractive red coloring and season of ripening makes the Blake a desirable peach to precede the Elberta.

Why Plant Bountiful Ridge Peach Trees

1. Only selected bud stock of known parentage used in propagation.
2. Our root stocks are the best money can buy—selected for rapid growth—hardiness and disease resistance.
3. Only soil which has been especially treated to produce high food value for normal development are used to grow our trees.
4. Continuous inspection of trees from seedling to finished tree, with correct spraying compounds, timing and technique to keep trees healthy while growing.
5. Rigid control of varieties from cutting of budwood—checking workers during budding time—correct charting of all varieties—more checking at digging time plus further checking in storage insures true-to-name trees.
6. Constant searching for new and better varieties and improved strains of old commercial favorites goes on year after year by men trained to recognize all factors which influence the selection of finer trees and varieties.

**✓ EARLY ELBERTA (11)**

The Genuine Gleason Strain.

A great commercial peach in Central and Northern areas where markets are not too distant and quality is a factor. One of the most beautiful of the Elberta type peaches. A large, attractively colored, yellow fleshed, freestone peach ripening with Belle of Georgia. The highest quality peach of all the Elberta types grown commercially. The trees are hardy, thrifty and bear consistently. The deep lemon yellow skin blushed with bright red makes it very attractive. IF YOUR MARKET DEMANDS QUALITY AND BEAUTY PLANT THE EARLY ELBERTA. Our trees are propagated from the old original strain of Early Elberta—(Gleason Strain).

SUMMERCREST (N.J. 94) (11a)

A large, oval freestone peach of fine quality, ripening with Georgia Belle. The flesh is deep golden yellow, melting and sweet. Tree is exceptionally vigorous, requiring light soil and very little nitrogen. Summercrest is hardy as J. H. Hale and adapted to regions having a climate similar to central and southern New Jersey.

✓ BELLE OF GEORGIA (11b)

The Leader of All White Peaches.

Fruit large, bright, attractive red almost covering the peach with white background. Flesh white, highly flavored and very firm and known universally as the best white peach in production. Tree very vigorous, hardy and productive.

✓ POLLY (11c)

A Very Hardy White Peach

Polly is very hardy, bearing big crops after 20 below zero winters. It is a freestone of exceptional quality, with a keen peachy taste, juicy and aromatic. The color is a beautiful white overlaid with a rich red blush. Recommended to all growers who wish an exceptional white peach in Elberta season.

HALE HARRISON (11d)

Plant Patent No. 814

(Grown under License from Patent Owner)

Also known as Hale Harrison Brilliant, we are pleased to offer trees of original strain and entirely true-to-name.

The peach ripens just before Elberta, is yellow fleshed, freestone, red over a golden ground, nearly fuzzless, generally large throughout the tree. Blossoms are self fertile, and abundant. Tree is a vigorous grower and heavy bearer.

Hale Harrison is a good shipper, long keeper, and picks over a long season. Quality is high for eating and other uses. PRICE FOR HALE HARRISON TREES IS 10¢ MORE THAN FOR REGULAR VARIETIES.

Orchard of M. D. Harper, LaGrange, N. C., in its second growing season and his grandsons. You may expect the same results with Bountiful Ridge Trees.

✓ REDSKIN (12)Beautiful Red Peach of Elberta Season
A MARKET LEADERUse This High Colored Peach to Replace
Elberta This Year.

Redskin ripens slightly ahead of or with Elberta. The tree is vigorous, fast growing and productive. Wood is hardy and the buds survive low winter temperatures. The fruit of Redskin is round, yellow flesh with little or no color near the pit. It is a complete freestone, firm, of excellent shipping quality, well colored with a deep red blush covering the fruit even when ripening under shady conditions. It is aromatic, vinous and sweet. It is rated high for canning. Fruit develops good size even with heavy load on trees.

DIXIELAND (12a)

This fine new peach is large freestone and has little pubescence. At maturity, about 50% of the surface is covered with an attractive red over a golden yellow ground. The flesh is yellow, firm, of good texture and flavor. It ripens about with Redskin and Elberta.

Trees are vigorous, productive, and self-fertile, somewhat resistant to bacterial spot and has a chilling requirement of 750 hours.

Dixieland was introduced primarily for the southern areas, but we believe it worthy of trial in all peach areas.

✓ ELBERTA (12b)

The World's Greatest Money-Making Peach

The tree is hardy, disease resistant, very thrifty and very productive under most conditions. The fruit is large, a freestone, skin of deep golden yellow and highly colored. The skin is tough and the flesh, while tender and juicy is of such texture that the Elberta is famous for its ability to carry to distant markets. The quality is good, and the slight bitter flavor is preferred by many. We are propagating our Elberta trees from selected orchards of great bearing records.

J. H. HALE (12c) It is $\frac{1}{2}$ to $\frac{1}{2}$ larger than Elberta and more highly colored. The skin is deep crimson, smooth, and almost without fuzz. Flesh is golden yellow, firm, and most delicious. A freestone with unusual keeping qualities. Fruit ripens a few days before or with Elberta, but hangs better. NOTE: J. H. Hale does not have an entirely perfect bloom and needs cross pollination for best results.

WHITE HALE (N.J. 63) (12d) A large white fleshed freestone of good quality, ripening with J. H. Hale. Tree is vigorous. A fine white fleshed peach to follow Belle of Georgia.

JEFFERSON (13) Jefferson is a round, yellow fleshed, freestone, ripening about 2 days after Elberta. The fruits are quite comparable to J. H. Hale but the color is much brighter. The trees are more vigorous than Hale, produce a heavy set of buds which are quite tolerant to spring frosts; much more so than Sunhigh and Elberta.

AFTERGLOW (N.J. 84) (13a) Ripens 3 to 5 days after Elberta. Fruits are large, round oval in shape and almost completely overspread with red. The flesh is yellow stained with red about the pit and is free. The trees are vigorous and rapid growers, the fruit buds appear more hardy than J. H. Hale.

SHIPPERS LATE RED (13b)

(Hale Type)

A Large, Productive, Handsome Peach

A very large, very highly colored, yellow fleshed freestone and good quality peach of distinct Hale type. Ripens just after Elberta and J. H. Hale. A good shipping peach, extremely productive. Very hardy and it brings top prices on the markets.

We are growing the true type as determined by comparison with fruit in U. S. D. A. test orchards, which is known as the Hale type.

SHIPPERS LATE RED

Bountiful Ridge Hale Type has proven to be the finest of all Shippers Late Red Strains. A trial will prove it.

GAGE ELBERTA (13c)

A Disease Resistant Bud Sport of the Famous Elberta Peach.

Recommended for resistance to bacterial spot. The tree grows as thrifty as Elberta. Gage Elberta blooms two to four days after Elberta and has a very strong blossom setting fruit under unfavorable conditions. The fruit is so like Elberta that only an expert can distinguish the difference. Ripens two to three days later than Elberta.

THE BRACKETT PEACH (13d)

One of the Best Varieties to Follow Elberta

This variety has proven one of the most profitable peaches in the Central area. Its season is about five days after Elberta, with a beautiful orange-yellow skin tinged with carmine. Flesh is a deep yellow and much lighter flavored than Elberta. This peach sizes up well under heavy crops and is equal to Elberta as a shipper. A perfect freestone and a real peach.

GEMMERS LATE ELBERTA (14)

Beautiful color, large size, excellent quality, fine shipping and keeping ability combine in GEMMERS LATE ELBERTA.

It is a typical Elberta in fruit and tree characteristics. It ripens 8 to 12 days after Elberta, just following Shippers Late Red and before Lizzie. Fruits are very uniform, large, well covered with a brilliant red, tough skin. Flesh very firm, being slightly tinged with red about the pit but red does not extend into the golden yellow flesh.

RIO-OSO-GEM (14a)

Widely Grown — A Beautiful Peach

A Hale type peach following Elberta 7 to 10 days. Fruit large in size with brilliant red color and light pubescence. The flesh is firm and fine textured with excellent flavor. Because of its firmness of flesh it is fine for freezing, canning and other uses. Rio-Oso-Gem is an outstanding commercial variety.

SO GOOD (14b)

A new, yellow freestone from Maryland ripening about with Rio-Oso-Gem. Fruits are large, highly colored, and most nearly resemble Redskin. It crops annually with good yields. Trees are vigorous and healthy, more upright than Redskin. So Good should have a place in your plantings.

LIZZIE (15)

Size — Firmness — Fine Color — Quality

It has been successfully grown in N. J., Conn., and in several Southern states. It is a distinct Elberta type peach, large, freestone having a fine yellow flesh and the peach ripens very slowly after being taken off the tree. It ripens from 12 to 16 days after Elberta, colors well with a handsome red over a deep yellow undertone. The tree is thrifty, hardy, heavy bearer of regular crops. Some growers consider it the best of our present list of real late peaches.

AUTUMN (N.J. 145) (16)

Considered One of the Best Very Late Varieties

The latest, large, yellow freestone ripening fully fourteen days after Elberta. The tree is very vigorous and should be planted on well-drained good peach soil. For the grower who wishes good size, high quality fruit for road side stand or nearby markets, Autumn fills the bill.

Gentlemen:

Through the years I have had such good service and good stock from your nursery, that I shall continue to highly recommend you. (My advice is asked at times, due to my having taught the fruit growing classes at the State University Agriculture & Tech. Institute at Farmingdale for about ten years).

Yours very truly,
Donald Ferguson
St. James, L.I., New York

REDCHIEF A recent introduction which gives promise of being one of the best of our white fleshed Nectarines. Fruits are good size, highly colored and freestone, with very pleasing flavor. Trees are thrifty and productive with fruit showing marked resistance to brown-rot. Redchief should be considered in every planting of Nectarines. Ripens 13 days before Elberta.

GARDEN STATE (N.J.) A large, firm, nectarine. Orange yellow undercolor, overspread with red, yellow fleshed, freestone. Ripens Hale Haven season, vigorous grower and one of our more desirable nectarines. Ripens 12 days before Elberta.

CAVALIER Cavalier is more highly colored than Redchief, not quite as large, but good size, fine yellow flesh of very good quality and seems to have marked resistance of brown-rot. The tree is vigorous and productive. Ripens 8 days before Elberta.

REDBUD Redbud is white fleshed, average size, freestone, and ripens about 27 days before Elberta. The skin is a good bright red with smooth finish and highly attractive. The flesh is above average in firmness, medium in texture, with good quality. The trees are of average vigor and produce heavy sets of buds. They are highly resistant to brown rot when the standard peach spray schedule is followed. The buds are more tolerant to late frost than Redchief but slightly less than those of Cavalier.

LEXINGTON A yellow fleshed nectarine. It ripens about 17 days before Elberta with average size fruit about 2" in diameter. The skin is deep yellow overlaid with red giving an attractive appearance. The flesh is of medium texture, free from the pit, and its flavor is comparable to Cavalier. Lexington is highly resistant to brown rot when the regular peach spray schedule is used. The trees are vigorous and set a large amount of fruit buds which are relatively hardy from late frosts.

RUBIED Nectarine The fruit is of large size, smooth skin, fine red color, and excellent quality, with winey flavor which is particularly pleasing.

Nematode Resistant Peach Trees

ON YUNNAN AND NEMAGUARD ROOTSTOCKS

Yunnan and NEW Nemaguard have proven to be resistant to the common nematodes found in most peach areas. Use of these rootstocks will enable you to continue growing peaches profitably in infested areas.

VARIETIES AVAILABLE ON YUNNAN ROOT

The European Plums

Generally Self-Fruitful

BRADSHAW Due to very large size, fine dark violet-red color, good shipping and keeping ability, the Bradshaw has continued to grow in popularity. The flesh is yellowish-green, juicy and pleasing to the taste. The tree is very vigorous, erect and productive.

STANLEY PRUNE

Proving to be the best of all Blue Prune Trees
Grows Well Anywhere — Produces Annual Crops —
Bears Early — Tree is Healthy and Vigorous

The fruit is of the Prune type. Excellent for cooking or eating out of hand. The tree is healthy, vigorous and fruit large in size. Dark blue with heavy bloom; flesh greenish-yellow; juicy, fine-grained, tender, firm, sweet, pleasant, quality good to very good. Freestone. Mid-season.

FELLEMBURG or ITALIAN PRUNE

It succeeds under most all climatic and soil conditions. The fruit is dark purple with a dark blue bloom, medium to large size, oval. The flesh is juicy and delicious and it is very fine for drying and canning.

SHROPSHIRE DAMSON Fruit oval; tree a good grower and enormously productive; fruit of medium size, produced in thick clusters or groups, dark purple color, esteemed for preserving.

NOTE—Most American and European Plums seem to be self-fertile and produce fruit on their own pollen, but produce better interplanted with other varieties. Oriental varieties have been found to be self-unfruitful and should always be interplanted at all times. Abundance is considered one of the best general pollinators.

The Oriental Plums

Oriental plum varieties are self-unfruitful. Two or more varieties should be planted for satisfactory results.

SHIRO

A very early, golden yellow plum which should have a place in every planting. The tree is low growing, hardy and prolific. The fruits are of medium size, suitable for cooking, canning and dessert use.

BRUCE PLUM

Considered one of the best of the Oriental type plums.

It ripens early (just after Mayflower peach), averages good size, very firm and fine quality for an early plum. If picked just as yellow background appears it will ship well and color a beautiful bright red with slight bloom over it in 3 or 4 days. Very productive but requires interplanting for pollination, using some other Oriental plum.

RED JUNE Mottled garnet-red color overlaid with delicate bloom; firm, light yellow flesh, aromatic and sweet. The trees are large, vigorous, hardy and productive. Blooms late and fruit is very resistant to Brown Rot and Curculio. Usually ripens a week before Abundance. One of the very good Oriental Plums.

METHLEY

A Fine Variety For Any Purpose

A recent introduction which is rapidly gaining popularity, due to its fine quality and handsome appearance. The fruit is medium to large in size, reddish purple in color with red flesh. It is juicy, sweet and of distinctive flavor. The tree is vigorous and upright in growth habit. Does well on most types of soil and is a heavy annual bearer.

ABUNDANCE One of the best Oriental Plums. Tree is a very rapid grower, healthy and comes into bearing quite young and yields abundantly; medium size, rich, bright cherry red with distinct bloom and highly perfumed; flesh light yellow, juicy and tender, and excellent quality. Tree vigorous and hardy.

SANTA ROSA

A Newcomer That Surpasses Burbank
Large — Attractive — A Sales Maker

One of the new and noteworthy Oriental plums. Surpasses Abundance and Burbank in many tree and fruit characteristics. Fruits are large and attractive. Tree is prolific bearer.

Dear Sir:
Received the shipment of 500 apple trees, they arrived in fine shape and very satisfactory.

James Bowers
Galesburg, Michigan

June 30, 1963

✓ OZARK PREMIER

New Variety for Extensive Trial

A fine recent introduction by the Mo. Exp. Station at Mountain Grove, Mo. Ozark Premier is vigorous in growth, has extremely large, firm, red, clingstone fruits. The flesh is yellow, juicy and tart, but with good flavor. It ripens about with Burbank which it most nearly resembles.

BURBANK Medium to large, orange-yellow, dotted and marbled with red, flesh meaty yellow, sweet and good; valuable for canning and a good market plum. Hardy and very prolific.

✓ YELLOW EGG

Size — Beauty — Quality

Tree is vigorous, roundtop, hardy and very productive. Fruit ripens late, large size, golden yellow with heavy bloom. Skin is thick, flesh golden, juicy, mild and fine in quality. Semi-free to freestone when fully ripe. Excellent for cooking and eating out of hand.

SATSUMA PLUM A Luther Burbank creation which enjoys a continued popularity. The fruit is medium to large, color reddish purple with pink bloom. Flesh dark purplish red, juicy, sweet, with an alluring aroma and distinctive taste. It is semi-freestone and recommended for those who want the best.

Methley Plums growing on a young tree in our test orchard. Methley is a fine variety for local use.

APRICOTS

ALMOST ALWAYS A SUCCESS WHEREVER PEACHES ARE GROWN

✓ MOORPARK One of the largest; orange-yellow with numerous specks and dots; flesh yellow, sweet, juicy and rich. August.

EARLY GOLDEN A good variety; very large, deep golden yellow, and fine in quality.

✓ SUPERB Rated by many as the best. The tree is large, very thrifty and hardy and is extremely productive. Very good quality. Fruit is beautiful yellow with slight blush; flesh firm and solid.

STELLA A hardy Russian type apricot that is very cold resistant. Produces good crops of fruit where other varieties freeze out. The fruit is medium size, golden yellow color and delicious in quality. A freestone. Recommended for all sections where peaches can be grown.

PRICES OF ALL APRICOT VARIETIES:

1 or 2 yrs.	Each	3-9	10-49
5-6 feet, 11/16	\$3.25	\$2.60	\$2.15

DWARF APRICOTS—PAGE 28

NEW EXTRA HARDY APRICOTS FOR HOME & ORCHARD

Limited quantities available this year. Offered in 3-4' & 4-5' grades only this season

✓ SUNGOLD A sister seedling of Moongold that ripens later. Fruit gold with orange blush, medium size, very high quality, freestone, and hangs well until ripe. Tree is medium sized, rather upright, exceptionally winter-hardy, very productive, self-unfruitful but pollinated by Moongold. For home use.

MOONGOLD A very hardy new apricot for the northern areas. Fruits are medium in size, orange-yellow, freestone and of good quality. Ripens earlier than Sungold; self-unfruitful but pollinated by Sungold. Trees medium sized, rather spreading, vigorous, and do well in cold climates. For home gardens.

CERTIFICATION OF INSPECTION — DUPLICATE OF NUMBER 23

August 20, 1963

THIS IS TO CERTIFY, That on the 15th day of August, 1963, we examined the Nursery Stock of the Bountiful Ridge Nurseries, growing in their nurseries at Princess Anne, County of Somerset, State of Maryland, in accordance with the laws of Maryland, 1898, Chapter 289, Section 58, and that said nurseries and premises are apparently free, so far as can be determined by inspection from San Jose Scale, Peach Yellows, Pear Blight and other dangerously injurious insect pests and plant diseases.

THIS CERTIFICATE is valid until September 30, 1964, unless sooner revoked, and does not include nursery stock not grown within this State, unless stock is previously covered by Certificate and accepted by the State Entomologist and State Plant Pathologist.

L. O. WEAVER, State Plant Pathologist

G. S. LANGFORD, State Entomologist

In addition to the above Certificate every shipment going outside of the infested area of the Japanese Beetle has a certificate of the U. S. Department of Agriculture showing the shipment is free from Japanese Beetle.

Bountiful Ridge Grown Sweet CHERRY TREES

are

High in Quality and Vigor — Heavy Producers
Long Lived — Beautiful

Use for BOTH FRUIT and SHADE

NOTE—Sweet Cherries bear heavier and more regular where properly cross pollinated and two or more varieties should be planted together.

Again note that Napoleon, Bing, Lambert and Emperor Francis are incompatible and a third variety should be planted with them.

Sour Cherries are generally self fruitful and will cross pollinate Sweet Cherries to a greater or lesser degree, depending on seasonal bloom period variations.

SWEET CHERRIES (All Varieties)

Prices given are per tree.

SENECA Ripens two weeks before Black Tartarian. The Cherries resemble Black Tartarian—large, round-cordate, purplish black, with juicy melting flesh and a rich sweet flavor; the pit is free and the skin does not crack. The tree is vigorous, productive, and has upright, spreading habit of growth. Early.

EARLY RIVERS This fine cherry highly regarded by cherry growers in Eastern New York. Ripens a few days later than Seneca and 10 days ahead of Black Tartarian. It is larger and firmer in flesh than Tartarian. Crimson black in color and excellent quality for dessert. Early.

BLACK TARTARIAN Very large; bright purplish black; tender; juicy, very rich. Tree a remarkably vigorous and erect grower, and is an immense bearer. Early.

VERNON The fruit is large, firm-fleshed, black and ripens just before Bing. The tree is vigorous and productive. 1 yr. trees only.

BING This valuable black cherry succeeds everywhere. Flesh very solid, flavor of the highest quality, a fine shipping and market variety. Midseason.

VICTOR Fruit resembles Napoleon and ripens between Gov. and Napoleon. Fruits are large, medium firm fleshed, light colored and of excellent quality. Tree is large, vigorous, and productive.

The famous new EMPEROR FRANCIS CHERRY

Plant hardy, vigorous trees from Bountiful Ridge this year for the best in sweet cherry production. Sweet cherries are always profitable.

NAPOLÉON BIGGAREAU (Royal Ann). A beautiful cherry of large size; pale yellow with bright red cheeks; flesh firm, juicy and sweet, one of the best for market. Midseason.

EMPEROR FRANCES Large, high quality cherry of the Napoleon type. Ripens just before Napoleon and is less subject to cracking. Promises to be one of the best main-crop sweet cherries of the Napoleon type. Midseason.

BLACK RUSSIAN

One of Our Finest New Hardy Sweet Cherries

In tree habit it is a vigorous grower, very hardy and highly productive. The tree has shown no injury at temperatures of 15 to 20 degrees below zero, nor have late spring frosts during bloom period affected the crop materially. The fruit is medium in size, does not crack or show tendency to brown rot before picking. The fruit is very dark in color being almost black. Flesh leaves pit readily. The flavor is distinctive, aromatic and delightful. We recommend this new cherry. Ripens just before Schmidt's.

SCHMIDT'S BIGGAREAU This fruit is very large size, with a fine rich flavor. Fruit grows in clusters. Is an excellent shipper. Tree is vigorous and one of the hardiest of all sweet cherries. Midseason.

GIANT Bears dark red cherries attractive in size and color; ripens just before Lambert. Quality is splendid and is less subject to cracking than Bing. Tree is large, vigorous, and very productive.

LAMBERT One of the largest of all Cherries. It is purple-red, firm and rich. Every year sees an enormous crop. The tree not only grows well, but is very resistant to insect and fungus attacks. Midseason.

WINDSOR Tree upright, vigorous and a rapid grower; fruit large, very firm and juicy; flesh pinkish and sometimes streaked; quality very good; a productive bearer; almost black. A leading commercial variety, used widely for pollination purposes. Midseason.

HEDELFFINGEN Ripens just ahead of Windsor and Lambert. Its performance in New York, Canada and Europe justifies its being recommended as a large, firm-fleshed, high-quality, late black cherry of the Lambert type. The fruit has the valuable attribute of being more resistant to cracking than most cherries.

Prices and grades on 1 year Sour Cherry are the same as on 2 year trees.

Write to us for special prices if you are interested in large quantities. Please give definite grades and quantities wanted and we will give you the advantage of any possible seasonal market changes.

✓ BOUNTIFUL STRAIN IMPROVED

MONTMORENCY

(DAYTON STRAIN)

Large Size — Vigor of Growth — Productivity — Plus Virus-Free Planting Stock Make It Superior To all Other Types Montmorency.

It was discovered in the orchards of Clyde S. Mumma, Dayton, Ohio, in a general planting of Montmorency trees and when we first saw the tree it was about 10 years of age and loaded down with fruit, having a heavier crop than any other trees adjoining it. All trees had the same attention and Mr. Mumma says it had always borne this large type of Montmorency. The tree is vigorous but not any larger than other trees. The fruits have the same rich red color as other Montmorency cherries but seems to be slightly more mild in flavor. Its immense size immediately attracted attention. We grew several hundred trees of this type for Mr. Mumma's own planting and now pass it on to our customers at no additional cost to them. Nature again contributes an improved type to one of our greatest sour cherries.

QUINCE TREES

Quince prices all varieties:

4-5 ft., 9/16 up \$3.00 each
3-4 ft., 7-9/16 \$2.75 each

ORANGE Roundish bright golden yellow, very large, fine grained, fine quality. Best for cooking. Firm, will stand shipping.

CHAMPION Fruit is very large, fair and handsome. Bears abundantly while young; flesh cooks as tender as an apple without hard spots and cores; flavor delicate quince taste.

Beautiful 1 Yr. Montmorency Trees

EARLY RICHMOND One of the most valuable and popular cherries, unsurpassed for cooking purposes. It is the good old variety that yields such marvelous crops in the gardens. The most hardy of all varieties, uninjured by the coldest winters.

SELECTED IMPROVED HANSEN'S

BUSH CHERRY

Desirable Fruits of a Dwarf Ornamental Shrub

Selected Hansen bush cherry has fruits resembling Montmorency only not as large. The fruits are edible and make fine pies. A True Dwarf Plant seldom attains a height of more than 3 ft. Blooms early spring, giving beauty as a shrub plant. Branches are almost covered with attractive red cherries of good size.

Hardy — Easy to Grow

18-24 inch branched, bearing size plants:

PEAR TREES

OLD HOME

Old Home has proved highly resistant to blight in all forms and is recommended as an intermediate or understock for pear varieties subject to blight. Those engaged in breeding work covering many years have proved the merits of Old Home to blight resistance. Plant Old Home trees in your orchard and graft to varieties wanted.

SECKEL Small, rich, yellowish-brown; one of the best flavored pears known; very productive. September and October. Blight resistant and a general favorite in every home planting.

CLAPP'S FAVORITE A large, fine pear, resembling the Bartlett; pale lemon-yellow with brown dots and a fine texture; melting, buttery, juicy, with a delicate flavor; tree hardy and productive. August and September.

KEIFER Grown in all sections of the U. S. and Canada. The tree is practically immune to blight, very thrifty and bears constant, heavy crops. The fruit is large to very large, golden yellow often blushed, juicy.

EWART PEAR The tree is a willowy grower but quite resistant to blight, bears young and annually. The fruit is remarkable for its large size and quality. It is greenish yellow, netted with russet, and has a fine melting, tender, juicy flesh. It ripens a month later than Bartlett.

MANNING ELIZABETH Among the best of our summer pears for home use or markets. The fruits are of handsome appearance and distinctive flavor. The tree is hardy, vigorous, productive, resistant to blight and bears early and annually.

IMPROVED BARTLETT Is similar in growth habit and fruit to the regular Bartlett. It bears young and heavy with well shaped and flavorful fruits.

Most important is the fact that this fine variety has never had pear blight in the years we have had it growing here. The parent tree is still thriving near Allen, Md., and it, too, has never had pear blight. While this new variety looks very encouraging and should be tried extensively, we cannot guarantee it to be blight proof. Growing conditions, tree vigor and planting site could possibly alter its fine record.

PLEASE NOTE—Most all Pears should be picked from tree before actually ripe and put in a cool (60 to 70 degree), shaded or dark place to finish ripening. They will be more juicy, sweeter and beautiful.

One Year Trees Sold by Height Only

Bountiful Ridge Pear Trees do satisfy. If you are interested in quantities larger than those listed, please write for our best prices. We want you to plant vigorous, hardy, Bountiful Ridge grown trees.

BARTLETT

Large size, golden yellow when ripe with a beautiful blush next to the sun. Buttery, very juicy, highly flavored; tree a strong grower, bears early and abundantly. August and September.

ANJOU (Buerre d'Anjou) A large, fine pear, buttery and melting with sprightly flavor; tree a fine grower and very productive. One of the best. October to January. (Blight resistant).

DUCHESSE D'ANGOULEME Very large, greenish-yellow, sometimes russeted; makes a beautiful tree. A heavy bearer, buttery, melting and sweet. October and November.

FLEMISH BEAUTY Large, juicy, melting and rich, a strong grower and good bearer; very hardy but prefers sunny location. September and October.

WORDEN-SECKEL This beautiful and delicious pear is rated very high. Size larger than Seckel. It is shaped like Bartlett, but is not as large. October.

DOUGLAS Hardy, blight resistant and productive. Often bears heavy at 3 years of age. Fruit is large, handsomely covered with red blush, and smooth finish.

BUERRE BOSC Greatly esteemed. A large yellow pear; flesh white, rich and delicious; has long stem which allows it to sway in heavy winds without dropping. Trees slow growers, but most productive; keeps until Christmas.

ORIENT PEAR The trees are large, vigorous, and requires little pruning to produce good yields. Blooms several days later than Keiffer. Fruit ripens late August and averages large. Flesh is creamy white with good texture, mild in flavor. The fruit keeps well in storage.

NOTE—Most Pear varieties are self-unfruitful and should be interplanted with other varieties. It should be noted that Seckel and Bartlett will not cross pollinate each other and where these two varieties are being planted another variety should be added. Duchess and Flemish Beauty are the most self-fruitful of those we list and are good pollinating varieties. We shall be glad to give detailed information upon request.

Dear Sir:

I received my trees and Flower Shrubs. Thanks so much for such wonderful trees. All have buds on them. We will order a big order of peaches this fall.

Sincerely,
Mrs. Arthur Hicks
Jessups, Md.

May 20, 1963

Three Brand New Pear Varieties

DAWN . . . Dawn is picking mature about two weeks earlier than Bartlett. Fruit generally resembles Bartlett but the skin is smoother. The fruit is very good in quality, aromatic, sweet, spicy, and very juicy. It ripens 12-14 days when held at 70 degrees, and is almost entirely free of grit cells.

The tree of DAWN is moderately vigorous, upright in growth, and bears mainly on short terminals. The tree is not highly resistant to fire blight and should only be grown where Bartlett is grown successfully. The flowers contain only a moderate amount of pollen.

MOONGLOW . . . Moonglow is a large, early ripening pear, which in limited tests appears promising for processing as well as fresh market use. It is picking mature about 10 days to 2 weeks ahead of Bartlett and will ripen to prime eating quality about 15 to 18 days after picking. The fruit is attractive, nearly free of grit cells, of soft flesh, and moderately juicy. Flavor is mild sub-acid and rated as good.

The tree of Moonglow is vigorous, very upright in habit, heavily spurred, and bears at an early age. Abundant pollen is present. The tree is very resistant to fire blight. Only

an occasional blighted spur or twig has occurred on these trees with no penetration of the blight cankers to the older wood. It is recommended for trial in all areas where blight is a major problem in pear growing.

MAGNESS . . . Magness is picking mature about 1 week later than Bartlett and ripens to eating condition about 10 days later when held at 70 degrees. The fruit is lightly covered with russet, medium in size, and generally oval in shape. The flesh is soft, very juicy, almost free of grit cells, sweet, highly perfumed, and aromatic. The skin is tough and resists insect puncture and decay. Magness can be held up to three months in cold storage and ripens with good quality.

The tree is very vigorous, spreading, and sometimes thorny. They begin bearing at about six years. The variety is entirely pollen sterile and must be pollinated with some other variety in order for good set.

The tree is very blight resistant. Only after a severe hail storm in 1959 was a small amount of twig blight seen, but this infection did not extend into the two year old wood. Magness is recommended for general trial because of its high blight resistance and high quality.

DEVOE PEAR

(PLANT PAT. 738)

Rich Appearance, Large Size, Early Bearing Habits. Long Keeper, Fine Quality. Disease Resistant and Heavy Cropper

Growers Everywhere Are Amazed At Production Records and Profits Gained with DEVOE . . . Join Those Who Know and Plant DEVOE This Year . . .

The DEVOE pear was found some 25 years ago by Charles Greiner of Marlboro, N. Y., as a chance seedling on his farm. The variety bears early and heavy with long Bosc-shaped fruits with smooth skin. The green color becomes a beautiful yellow with an outstanding red cheek as harvest time approaches. The flesh is firm, white, and lacks grit cells. Quality is superb. It is very juicy and sweet. Fruits of Devoe will keep well in cold storage until late January when picked at the right stage of maturity. It ripens and should be picked about a week after Bartlett.

The tree is upright in habit, wood is whippy and bears fruit load without breakage. It is very resistant to pear Psylla.

DEVOE, for years, has been advertised as being BLIGHT RESISTANT and we believe that it is. Blight Resistance in no way implies that the variety will be completely free of the fire blight disease, regardless of the cultural practices used. By its very nature, Devoe is a fine vigorous grower and does not need heavy fertilization, constant cultivation or extensive pruning for good results. Most successful pear operations involve little pruning, low nitrogen levels, sod culture or very little cultivation. DEVOE, when treated in a like manner, will, in most cases, prove very satisfactory.

We continue to recommend DEVOE Pears for all pear growing sections.

PLANT DEVOE THIS YEAR FOR GREATER PROFITS.

Handsome DEVOE Pears at the home of Mr. Curvin Lippy, Ambler, Pa. "Devoe pears are beautiful, delicious, and easy to grow," writes Mr. Lippy.

Prices Same As Other Pears — Page 18

Skyline

SUPREME

RED DELICIOUS

New ! EARLY COLORING — EARLY RIPENING — EARLY BEARING

SKYLINE SUPREME is a tree sport of the Starking variety originating in the orchards of Wm. E. Dalton, high in the hills of the Blue Ridge, near Hendersonville, N. C. It is particularly outstanding because of its early coloring and early ripening habits.

Fruits of SKYLINE SUPREME reach full color and maturity several weeks ahead of such varieties as Richared and Starking, and many days earlier than most of the other recently introduced early coloring types. They color equally well under shaded conditions or in normal light. In the Hendersonville area, where all the testing has been done, fruit of SKYLINE SUPREME have normally had sufficient color by the first of August to pack 100% Extra Fancy. Actual maturity is about 10 days later but still much earlier than its closest competitors.

The color of SKYLINE SUPREME is a beautiful blush red without a trace of a stripe. This fine apple is endowed with a double pigmented layer adding brilliance and lustre to its color.

Under Appalachian conditions, SKYLINE SUPREME tends to exhibit a strong habit toward the sheep-nosed condition which is prevalent among western grown Delicious. The tree is vigorous, bears young, sets large crops of good size, highly colored fruits. The blooms of SKYLINE SUPREME are similar to and come at about the same time as other types of Red Delicious. They also need pollination for best results.

SKYLINE SUPREME is truly of Eastern origin and we feel it is much more adapted to our general conditions than types from other areas. From our observations and comparisons of many newly introduced types over the last several years, we heartily suggest its trial in all Red Delicious growing areas in the eastern U. S.; even at low elevations.

SKYLINE SUPREME is a regular tree type sort of Delicious. We have grown them on semi-dwarf (Malling VII) anchor rooted trees for those who would like the smaller tree. Price is \$.10 per tree higher in all grades and quantities than regular apple varieties, standard and dwarf.

NEW KING LUSCIOUS NEW

Large Size Good Flavor

KING LUSCIOUS, probably the largest good apple to come to the planter in many years. KING LUSCIOUS was found by the late Wm. M. Dalton of Hendersonville, N. C., who later crossed it with Red Delicious and King David, resulting in the fine apple which we are pleased to introduce to our trade.

KING LUSCIOUS is a very large, highly colored apple with good keeping, eating and cooking qualities. The skin is a deep red at maturity with a beautiful bloom. The flesh is pure white with excellent flavor. The season of ripening is with Rome Beauty and Stayman, although it may be picked sooner for cooking purposes if desired. The tree is a young and annual bearer, blooming a week after Rome Beauty to make it almost completely frost proof.

The tree is semi-dwarf in habit, sets its scaffold branches well, and needs little pruning. Both tree and fruit are resistant to apple scab.

We believe KING LUSCIOUS has a place in every planting; not only because of its large size and attractive appearance, but because it is the most frost resistant apple variety we know of.

Please refer to outside back cover for color illustration of this new and wonderful apple.

CRAB APPLE

HYSLOP Season September to October; tree vigorous, very hardy. Fruit medium yellow ground with heavy shadings of deep crimson and splashes of maroon with heavy blue bloom. Flesh fine, firm, yellow astringent. Bears abundantly in clusters which makes tree exceedingly ornamental.

DOLGO A handsome Red Crab apple of medium size. The fruit jellies easily and makes rich, ruby red jelly. Tree hardy, vigorous, productive, medium size and especially adapted to ornamental planting.

APPLE SEEDLINGS

Save Those Valuable Damaged Producing Trees By Bridge Grafting and Low Inarch Work.

This is the common apple seedling that has been used in propagating apple trees for generations. We can supply these two year old strong roots and one year tops in the following sizes and prices; (supply limited).

	10-50	50-200	200 or more
18-24 in. \$.30 each	\$.25 each	\$.20 each	
2-3 ft.40 each	.30 each	.25 each	
3-4 ft.45 each	.35 each	.30 each	

NOTE—The ripening order of varieties is designated by bracketed number after the name. Varieties overlapping in ripening season are indicated by subletter. We are endeavoring to give the ripening order and not the picking order as this will vary greatly according to the grower and where they are marketed. We trust this listing will be helpful to you.

WRIXPARENT (1) Earliness, Annual Bearer, Large size, Quality, Good Shipper, Early Bearing, and Blight Resistant all tell the story of this fine apple. It was found as a chance seedling in a Yellow Transparent orchard. Ripens 10 to 15 days earlier than Transparent, is an attractive light green without markings, white fleshed, fine texture, sub-acid in flavor, and rates high as a cooking apple.

YELLOW TRANSPARENT (2) Holds a long record as our most widely planted early commercial apple. Tree grows upright hardy, early bearer, good size, skin clear white to pale yellow in color. Flavor very good. An excellent cooking apple known to the housewife everywhere. Ripens early July.

LODI (Big Transparent) (3)

Lodi is One of Our Best Early Apples

The Lodi is one of our most worthy early Apples. It has the same quality and flavor as Yellow Transparent, but is much larger and more firm. The tree is more spreading and vigorous, better shipper and does not show bruising as badly. It ripens a few days later than Transparent but due to size can be picked with that variety if desired. Lodi should be interplanted for best results as it needs cross pollination.

WILLIAMS' EARLY RED (3a) Among the earliest to ripen and the largest of all early apples, a better name for it is "Big Red Apple." Flesh is white, juicy and slightly tart, tender and crisp. A very good one, like Transparent bears heavily on young trees.

EARLY MCINTOSH (4) McIntosh Hybrid being almost red in color, very crisp. A thrifty grower and a regular bearer. Your opportunity to have the McIntosh type as a very early apple. Cash in on the popularity of the McIntosh by growing Early McIntosh for your markets.

STARR (4a) One of the finest early apples grown. Can be picked over a long period of time; large and of a fine yellowish color; a great bearer and a valuable market variety; comes into fruiting very young.

SUMMER CHAMPION (4b) A bright red apple ripening in mid-summer with good size and fair quality. The trees bear early and produce heavy crops. We feel this fine looking apple should have a place in most plantings of summer apples. It is good for local and distant markets.

RED GRAVENSTINE (5) This favorite of many years as a summer apple of fine quality and shipping ability is now offered in a Red Strain. Large well colored with slightly yellow flesh, fine quality. Tree vigorous and productive. Ripens somewhat irregular and should be picked several times.

BEACON (5a) A highly colored, early apple with excellent eating and shipping qualities. Ripens just before Wealthy and after Williams Early Red. The tree is vigorous, healthy, and a heavy producer. Fruit hangs well and can be picked over a long period of time to get the best size and color. Averages $2\frac{1}{2}$ inch fruit with normal crop.

BLAZE (5b) A new Jonathan type apple ripening about $3\frac{1}{2}$ weeks earlier than Jonathan. Fruit is medium in size, attractively blushed with red over golden yellow, and somewhat less tart than Jonathan. Tree is upright, spreading, vigorous, and productive. Blooms two days after Jonathan.

MILTON (6) Typical McIntosh, coloring full red; very good quality, about equal to McIntosh, being same textured apple. Tree hardy and vigorous. Ripens three to four weeks before McIntosh or just before Wealthy.

RED WARRIOR (6a) The tree is vigorous, well formed similar to McIntosh and bears regularly. The fruit is large, normally averaging better than three inches. The skin is smooth and colored a brilliant red from stem to calyx, and does not bruise easily. Its ripening season is about with Wealthy or a little earlier. It is sub-acid in flavor and is an excellent cooking apple. The apple is shaped nearly like a Stayman.

NIAGARA (6b) New 1962 introduction from New York which provides a McIntosh type apple about two weeks earlier. In appearance, flavor, and tree habit, Niagara is very similar to McIntosh. Its desirable picking season and similarity to McIntosh should help its commercial acceptance.

WEALTHY (7) This beautiful, moderate sized, brilliant red apple is of fine quality; one of the best of its season. It is a relatively good keeper, and owing to the hardness of the tree, its adaptability to cold climates and early bearing habits, it can be profitable as a filler.

SUMMER RAMBO (8) Large, flat, streaked red and yellow, very tender, juicy and fine flavored. Tree very vigorous semi-spreading grower, hardy and productive.

SKYLINE SUPREME DELICIOUS (8a)
See full description on page 20. See color illustration on cover page.

IMP. ALL RED MCINTOSH (8b)

Earlier Coloring — Solid Red — Fancy Fruits

A special selected strain of the famous McIntosh apple, coloring a solid red without a trace of stripe. Without question this is the finest type of McIntosh that has come to our attention and will say that if you are not getting sufficient color on your present plantings of McIntosh you should make your new plantings of this Improved Type this year.

The Famous McIntosh Apple

LOBO (9) About same season as the McIntosh, larger apple and colors a more full red than regular McIntosh. Extra good quality. Tree equal to McIntosh. Comes highly recommended to replace the regular McIntosh for the Middle Atlantic and Southern growers.

CORTLAND (9a)

Noted For Vigor and Productivity

Cortland is an improved McIntosh type. The fruits of the two varieties are similar but those of Cortland are more oblate, average larger, and are more uniform in size; they have more color and the red is lighter and brighter and the striping and splashes are laid on differently; the taste of Cortland can hardly be distinguished from that of McIntosh; the flesh is firmer but just as juicy; the apples do not drop so readily and ship better.

WAYNE (9b) Result of a cross of N. W. Greening X Red Spy introduced in 1962 by New York. It matures with Cortland, is of large size, and colored a solid scarlet bluish. Flesh texture and flavor is very similar to Northern Spy. Trees bear early and annually, bloom late. Wayne is a first class apple for sauce, frozen, and canned slice packs.

SMOKE HOUSE (10) Comes into bearing moderately young. It has a thin skin of yellow, striped with rather a dull red and is very attractive. A favorite of the home orchard.

Improved All Red Jonathan (10a)

Productiveness, Quality, Places it First
Among Apples of its Season

This is a special bud selected strain of the famous Jonathan Apple. We have tested it in every section of the country, in trial plots and commercial orchards for more than twenty years and have found it superior in most all cases. Highly colored Jonathan apples bring the fancy prices. Use this fine, proven red strain of Jonathan for replanting and new planting work. We are sure they will satisfy your needs.

GRIMES GOLDEN (10b) An apple of the highest quality. It is one of the fancy dessert apples and ranks with Delicious and Jonathan on the market. Medium to large; bright yellow; flesh fine grained, juicy, with a very pleasing spicy flavor. The tree is hardy, grows upright and is quite disease resistant. Highly recommended and widely planted to pollinate self-sterile varieties.

FRANKLIN (10c) The fruit flesh is faintly yellow, fine grained. It is mild, moderately juicy, not quite as sweet as Delicious but with more character than McIntosh. Franklin excels both parents in appearance having a brilliant red over-color, resembling Delicious, with a golden yellow under-color with very distinct bloom. Fruits are medium to good size, oblong in shape. Franklin is notable for fresh dessert quality which is best from late October to early January. Blooms about with Delicious, Jonathan, Rome; ripening a week earlier than Delicious and a little later than Jonathan. It is a heavy annual bearer where properly pollinated.

IDARED (10d) A CROSS BETWEEN WAGNER AND JONATHAN. Its season is with or a little later than Jonathan. Fruits are medium to large, stems medium long, slender; cavity broad, deep; calyx small, basin shallow. Strikingly beautiful bright red color. Skin smooth, medium thick, waxy; dots sparse, inconspicuous; rich yellow under-color. Fruits hold form as well as Rome when baking. Creamy white, smooth textured flesh. Tree form resembles Jonathan, more upright, spreading, seems rather resistant to blight. A regular bearer.

JONADEL (10e) This variety is the result of a cross of Jonathan and Delicious. The fruit is larger than Jonathan, milder than Jonathan but more acid than Delicious. Color is equal to Jonathan. Dessert qualities are excellent. Jonadel ripens with Jonathan, keeps well in storage until March or April with no evidence of Jonathan spot or internal browning. Fruit tends to drop unless treated with NAA. The tree is less susceptible to fire blight than Jonathan.

JONAGRAM (10f) A cross of Ingram x Jonathan. The fruit is of medium size, roundish, with thick, tough skin that is pale yellow overlaid with red. The flesh is whiter than Jonathan, finely grained; juicy, crisp, tender. The apples keep well in storage. Jonagram matures with Jonathan but blooms late, about 12 days after Jonathan and Delicious, and 6 days after Golden Delicious and Rome Beauty.

SPARTAN (10g) A very attractive McIntosh type ripening about a week later than McIntosh. Flesh is firm and dessert quality is good. Storage life is weeks longer than McIntosh. We recommend it for trial where a McIntosh type that can be picked later and stored longer is desired.

The JONATHAN APPLE, grown from coast to coast, ranks today as one of the best general purpose apples. A favorite of its season on domestic and foreign markets.

TWENTY OUNCE (11) Fruit exceptionally large, juicy and crisp, sub-acid, color green with slight blush and red stripe. Tree thrifty and very productive, generally recognized as our best summer baking apple.

OPALESCENT (11a) Very large, brilliant dark red all over. Tree bears young and very prolific. Average quality. Its size and beauty recommend it for planting in Central and Northern areas.

NORTHWESTERN GREENING (11b) Tree vigorous grower, quite hardy. Fruit large to very large; green, becoming yellowish-green when ripe; flesh yellow, fine grained and firm; flavor good, sub-acid; very smooth and attractive.

PACIFIC GOLD (11c) Pacific Gold originated as a chance seedling in Southwest Oregon and was introduced in the late 40's by J. E. Miller of California.

The tree is moderate in size with well-spaced, strong, wide angled limbs. It bears young and yields heavy crops annually.

The Fruit of Pacific Gold is large, with crisp, tender flesh, quite sweet, and of fine dessert quality. The skin is yellow looking much like Yellow Delicious and Mutsu. The season is late fall or early winter. Pacific Gold keeps well in storage and should be tried in areas where russeting is a problem with Yellow Delicious.

SPIGOLD (11d) A very high quality dual purpose apple from a cross of Red Spy X Golden Delicious which matures about with Golden Delicious. Spigold has exceptional quality and should be an excellent home garden variety.

YELLOW DELICIOUS (12) This apple is famous for its unique quality, embracing a combination of flavors which is hard to equal. This combined with the fine, firm textured flesh of the apple and the beautiful, golden yellow skin at once attracts the eye of the consuming public. The tree, while not a large growing type, is thrifty and extremely productive, coming into fruiting and giving an abundant crop while very young.

MACOUN (12a) Very highly colored, having no stripe. Same quality as McIntosh, same textured fruit, hangs to the tree better than McIntosh and ripens one to two weeks after Cortland. Tree about equal to McIntosh, a regular bearer, and strongly recommended to lengthen the McIntosh season.

RICHARED DELICIOUS (12b)

SUPERB QUALITY — BEAUTIFUL BRIGHT

SOLID RED COLOR

The **RICHARED DELICIOUS** is a blood red mutation of the famous Delicious Apple. Facts about the **RICHARED**: You have a tree of the same hardy characteristics as the old Delicious, producing an apple with the same appetizing, delicious flavor, producing an apple that colors a full bright red, without a trace of stripe, on every part of the tree, the apple attaining this color weeks before we usually pick the regular Delicious.

DOUBLE RED DELICIOUS (12c) A bud selected sport of the famous Delicious apple highly recommended for early color on low elevations.

The description of **DOUBLE RED DELICIOUS** follows that of Delicious except its ability to lay on early color at low elevation which the regular Delicious will not do.

The apple gets very dark in color at elevation of 100 feet or more and we recommend our **RICHARED DELICIOUS** for planting above that elevation.

Our Double Red Delicious is favorably compared with what is being sold as Starking.

MUTSU (12d) A new Yellow Delicious type apple from Japan that is highly resistant to russetting. It has been widely tested in this country and is meeting with wide approval. Fruits are generally larger than Yellow Delicious and with coarser flesh. A possible replacement for Yellow Delicious because of its resistance to spray injury, late keeping qualities, vigorous growth of tree, and larger fruit.

Early Red Stayman (Neipling's) (13)

One of the Finest of The Stayman Sports

Observations covering many years prove Neipling's to be superior. You will not go wrong when you plant this strain of bright Red Stayman.

Colors 100% all over the apple from 10 to 20 days before the regular Stayman. Growers can pick the entire crop at one picking if desired and avoid losses. Cold storage tests show it will keep through to following May and come out with less scald, more flavor and more snap than any other type Stayman. It's different—It's what you want—it has the natural full bright Stayman finish.

NORTHERN SPY (14a) Large, roundish-conical, often flattened, slightly ribbed; handsomely striped with red; flavor rich, aromatic, mild sub-acid, fine. Keeps thru Winter and late into Spring.

RED NORTHERN SPY (14b) Red Spy is a typical Northern Spy except in color. The Red Spy colors a solid bright red without either stripes or splashes. If you desire more color in your Spy apples plant the Red Northern Spy.

TURLEY (14c) The trees resemble Stayman and are vigorous rapid growers; productive and early bearing. The apples average large to very large, skin smooth and colors a bright attractive red over the entire apple. Flesh firm, quality is good, but cannot be classed as a high dessert apple. The value of this apple lies in the fact that it will not crack under normal conditions.

COLORA RED YORK (15) Earlier Coloring, Earlier Picking, Greater Profits.

The tree of Colora Red York has the same rugged characteristics as the old York Imperial, but will color 100% over the entire tree under most any conditions. The Colora Red York can be picked from 1 to 2 weeks earlier than Regular York. The entire crop can be picked at one time if desired. We do not know of any other type that will give the grower such attractive apples as the Colora Red York produces.

Our Trees Are Inspected For Trueness-To-Name

THERE IS NO GUESS-WORK WHEN YOU PLANT BOUNTIFUL RIDGE GROWN STOCK

The World's Most Eminent Authorities on Tree Identification Say Bountiful Ridge Grown Trees Are "True-to-Name."

TO WHOM IT MAY CONCERN:

All saleable apple, pear, plum and sweet cherry varieties propagated and now growing at Bountiful Ridge Nurseries have been examined by the Pennsylvania Trueness-to-name Inspection Service. To the best of our knowledge, these trees are true to name as they now stand in the nursery row.

University Park, Pa., August 10, 1963

Pennsylvania Trueness-to-Name Inspection Service

RED YORKING (15a) Another red sport of York Imperial that has merit. We offer this variety to our customers who have experienced more success with Red Yorking than Colora Red York because of site conditions, etc.

MELROSE (15b)

A New Late Keeping Winter Apple

A cross of Jonathan and Delicious. Tree blooms later than either parent. Fruits ripen just before Stayman, keep well in cold storage until April and so far has proven free of Jonathan spot.

Fruits are well covered with an attractive carmine and have a live yellow undertone. Fruits larger than Jonathan—firm, crisp, juicy, not as tart as Jonathan or as sweet as Delicious. Excellent cooking and dessert quality.

Tree bears moderately young, is upright, spreading with good crotch angles and develops to reasonably large tree.

BLAXTAYMAN (16) In the Blaxtayman we have every characteristic of the famous Stayman apple with the exception that the fruit colors a beautiful solid red. The fruit is equally as large or larger than the regular Stayman. The trees are equally as thrifty as the regular Stayman. The apple has a slightly tougher skin which tends to make it keep better in storage and carry better to the markets. The apple has the same shape as the old Stayman. The flesh finer in texture and more mild in flavor when grown at lower elevations than the old Stayman. The Blaxtayman will not get a dark and unattractive color if allowed to remain on the tree but instead the apples become more brilliant and beautiful.

CORTLAND

Large size, heavy crop, good pollinator, vigorous grower, good shipper—fast becoming the growers' choice of the McIntosh types.

Improved Double Red Stayman

(201 Type) (16a)

One of the newer introductions which has found favor with some growers. Trees and fruit characteristics similar to Blaxtayman except it has a more brilliant color which lays on earlier and does not get the dark shade often found in some Stayman types. Our observations show this type to compare very much with our Early Red Stayman.

RUBY (16b)

A PROMISING LATE KEEPING APPLE

A recent introduction resulting from a cross between Gallia Beauty and Starking. Ruby has great eye appeal because of its striking brilliant over-all carmine red. The tree resembles Rome in growth, bears early and tends to produce annually, blooms about with Rome or Gallia and just after Delicious. Picking date is about with Rome or may be picked just before Stayman. As a dessert apple the flavor is good, surpassing that of Rome Beauty. It is somewhat juicy, neither sharp nor sweet but pleasingly mild; cooking does not detract from the flavor but seems to improve it; whether baked or stewed the flesh has tendency to hold its shape well. Fruits hold well in storage into April and May, being less susceptible to scald than Rome Beauty.

KING LUSCIOUS (16c) See page 20 for full description. Color photo on cover page.

WINTER BANANA (17) Vigorous grower; early bearer. Fruit medium to large, smooth and handsome golden yellow, usually shaded with red blush; flesh fine grained, rich sub-acid, aromatic; highest quality.

BALDWIN (17a)

Buds were selected from one of the finest producing Baldwin trees ever observed. No type yields larger crops, bears shipment better or is more attractive in color, size and shape than the Collier Baldwin. It is esteemed as an eating apple and for cooking.

MONROE (17b) Tree resembles that of Rome Beauty in appearances and growth while the fruits resemble the Jonathan and both appear to have no major faults, tree being vigorous, upright-spreading and annual bearer. Fruits large, roundish-conic, resembling a well colored Baldwin with brighter color as Jonathan. Apple flesh is light yellow, crisp, juicy, mildly sub-acid, quality good for dessert or processing. A winter apple ripening after Baldwin and before Rome. It can be recommended for planting throughout the Central and North Eastern fruit areas.

GALLIA BEAUTY (Red Rome) (18)

The Gallia Beauty originated in Ohio and is a typical Rome type tree, being thrifty, hardy and productive. The fruit of the Gallia Beauty colors a brilliant bright red, without stripe and seems to be of higher quality than the regular Rome Beauty and keeps exceptionally well in storage. The Gallia Beauty will size up equal to the regular Rome but many of the other inferior so-called Red Rome types will not size up satisfactorily and again we urge you to plant only the Genuine Gallia Beauty. We offer you the best and charge you no more.

Jersey Red (18a) A cross of Gallia Beauty and White Winter Pearmain. Fruits are large round-oblate, colors a deep attractive red. Very firm and late keeping as is Rome. Holds to tree exceptionally well. The tree is very vigorous, with large heavy foliage resistant to blight and breakdown. Fruit seems a little better quality than most Roman types.

ROME BEAUTY (18b) Keeps in good condition till May and June. Large round, mottled and striped to handsome shades of red; flavor and quality way above the average; appearance and size are its valuable points; always sells and always brings good prices.

RED. ROME (No. 262 Type) (18c)

This type Red Rome comes to us from the far West and has been planted widely in the Appalachian fruit area. Its merits over Gallia Beauty are questionable, but some growers like it better.

Have A Reputation Backed By Over 80 Years Production Experience

CRANDALL (18d) A cross between Rome Beauty and Jonathan. Tree is moderately vigorous, heavy annual bearer. Lateral branches form wide angles. Foliage is not susceptible to apple scab. The skin tough, moderately thick, developing heavy wax when in storage. The flesh is yellowish-white, firm but fine-grained, crisp and juicy. The flavor is mild sub-acid, aromatic, very good to excellent quality as dessert and cooked. Does not spot as Jonathan.

PARAGON (19) One of the best of the long-keeping winter varieties. Does well on almost any soil; thrifty grower and fruits young; bears regularly; is of the Winesap type, good quality; coloring a deep dull red almost all over; flesh slightly yellow. Needs cross pollenization.

BOUNTIFUL STRAIN IMP. WINESAP (19a)

A Glorified Selection of the Famous Winesap with the same Beautiful Color—Same Quality—Same Keeping Ability.

A fine, large, red Winesap found years ago in the orchard of The Consolidated Orchard Co. of Paw Paw, W. Va. This strain produces heavy annual crops of fruit that, very often, is as large as Stayman. The fruit has every characteristic of the Old Virginia Winesap in shape, color, quality, and growth habits. The tree is typical Winesap including leaf markings. Bountiful Strain Imp. Winesap have become a favorite with orchardists for local and long distance sales. They are especially popular as an extra long keeping variety for use in polyethylene bags.

Dwarf Apple Trees by Bountiful Ridge

.... THEY SATISFY

LOWER PRODUCTION COSTS - SMALL TREES AT MATURITY

LARGE SIZE FRUIT - GOOD QUALITY - QUICK TO BEAR

SELECT YOUR NEEDS FROM THESE PROVEN EAST MALLING ROOT STOCKS

VARIETIES ON EAST MALLING NO. 9 ROOTSTOCK

Smallest of all dwarf apples — The choice of most home owners

Very early to bear — 8 to 12 foot tree at maturity.

All Red Jonathan
All Red McIntosh
Bountiful Imp. Winesap
Red Warrior

Skyline Supreme
Early McIntosh
Early Red Stayman (Neiplings)
Gallia Beauty
Grimes Golden

King Luscious
Richarded Delicious
Yellow Delicious
Yellow Transparent

This is the most dwarfing of all the apple stocks being propagated by nurserymen today. Trees start to bear in two to three years, producing large, highly colored apples. Ideal for small city gardens and now being utilized by the commercial orchardists quite extensively. Due to a very light root system, trees on this stock usually need staking for a few years.

VARIETIES ON EAST MALLING NO. 7 ROOTSTOCK

Generally the best for orchard planting — Medium sized tree that is easy to care for — Seldom needs staking

Grows well on most soils

All Red Jonathan
All Red McIntosh
Colora Red York
Double Red Delicious

Grimes Golden
Early Red Stayman (Neiplings)
Idared
Lodi
Double Red Stayman 201

Ruby
Red Warrior
Melrose
King Luscious
Richarded Delicious
Yellow Transparent
Yellow Delicious
Williams Early Red

The ideal stock for small, semi-dwarf trees, cordons and espaliers. Does particularly well on heavy clay soils. It has proven to be very hardy and has a good root system which makes a well anchored medium for small trees. Seems to grow vigorously in its early years but soon settles down to slower growth and heavy cropping. Generally recognized to be one of the best understocks for commercial planting as well as the home fruit grower.

VARIETIES ON EAST MALLING NO. 2 ROOTSTOCK

Recommended for orchard planting in many areas — Good root system, grower and producer

Slightly larger than trees on No. 7 stock.

Gallia Beauty	All Red McIntosh	Skyline Supreme
Early Red Stayman (Neiplings)	All Red Jonathan	Yellow Delicious

A good medium-vigorous stock with a good root system. Though this stock makes a larger tree than E. M. IX or VII, it does have the early bearing characteristic of them. Trees behave well on most soils and are not being used quite extensively in commercial planting. The stock has been found resistant to crown rot.

DWARF APPLES WITH MALLING-MERTON ROOTSTOCKS

WOOLLY APHID RESISTANT . . . HEAVY AND EARLY BEARING

Our supply of trees on these new rootstocks is very limited for this season.

M. M. 104—Semi-Dwarf . . . Tree about the same size as E. M. 7 on sand; a little larger on loam. Good root system for anchorage, early heavy crop, resistance to crown rot recommends it.

Yellow Delicious	Double Red Delicious	Early Red Stayman (Neiplings)
Skyline Supreme	All Red McIntosh	

M. M. 106—Semi-Dwarf . . . Identical to E. M. 7 on loam but somewhat smaller on sand. Valuable for sites where E. M. 9 makes a small tree.

Yellow Delicious	All Red McIntosh	Early Red Stayman (Neiplings)
Skyline Supreme	All Red Jonathan	Richared

M. M. 109—Vigorous . . . Quite similar to E. M. 2 under most conditions. Seems to withstand drought better than E. M. 2.

Yellow Delicious	Double Red Delicious	Double Red Stayman 201
Skyline Supreme	All Red McIntosh	

M. M. 111—Vigorous . . . Trees about same size as E. M. 2 but bear heavier. Gives largest yields without increasing tree area.

Skyline Supreme

NEW LOW PRICES ON ALL DWARF APPLE TREES

Prices are per tree	each	3-9	10-24	25-49	50-99	100 or more
5-6 ft., 2 yr. branches and whips	\$3.75	\$3.50	\$3.25	\$3.00	\$2.75	\$2.50
4-5 ft., 1 and 2 yr. branched and whips	3.00	2.75	2.50	2.30	2.10	1.80
3-4 ft., 1 and 2 yr. branched and whips	2.75	2.50	2.25	2.00	1.75	1.50
2-3 ft., 1 yr. whips	2.25	2.00	1.80	1.60	1.40	1.20

Please state whether you prefer whips or branched trees. PLEASE WRITE FOR SPECIAL QUOTATION WHEN LARGER QUANTITIES OF DWARF TREES ARE NEEDED.

ALL BOUNTIFUL RIDGE DWARF APPLE TREES ARE MARKED AT PROPER PLANTING DEPTH.

DO NOT SET DEEPER THAN THE WHITE PAINT MARK

GET ADDED DIVIDENDS WITH BOUNTIFUL RIDGE DWARFS — We are now using a short anchor root of standard apple seedlings at the base of most of our dwarf trees. This anchor system is all under ground; the Malling piece is rooted, too. The variety is budded to the Malling stock 6 to 8 inches above the ground to cause the dwarf effect. We have been doing this type of work for many years and the results have been very satisfactory. The use of the anchor root thus gives a strong root system to an otherwise poorly rooted tree and makes it more readily adaptable to ordinary home and orchard planting.

PLEASE NOTE — We recommend trees on East Malling IX be planted 12 to 16 feet apart while those on East Malling VII, II, be planted 15 to 25 feet apart. Malling-Merton distances should be the same as for the East Malling stocks with which they most nearly compare. Trees with anchor root systems should be planted slightly farther apart than those with only East Malling or Malling-Merton root systems.

Dwarf Fruit Trees for the Home Gardener

FULL SIZED FRUIT FROM VERY SMALL TREES - PICK AND SPRAY ALL FRUIT FROM GROUND
EASIEST OF ALL TO CARE FOR

DWARF PEACHES — The Queen of Garden Fruits

Can you imagine having your own beautiful, luscious, fruit right on your own peach tree, right in your back yard. These trees are small; never more than 7-8 feet tall, easy to spray, easy to prune. They bear heavy crops of large sized peaches, beginning in the second or third year and continuing for many years. All varieties listed are self-fruitful and need no cross-pollination. Full descriptions of these varieties can be found in the general peach section.

Dwarf Apples

The King of Your Garden

Heavy bearing, Early bearing, Easily cared for. Don't miss this opportunity to become your own apple provider. See our complete variety list in the Dwarf apple section, pages 16 and 17. Use E. M. IX rootstocks for the very smallest trees where limited space is a factor. Use E. M. VII or E. M. II rootstocks where trees can be placed 15-25 feet apart.

ATTENTION:

Use Pratts Fruit Tree Spray for all these trees and insure success. Prices and information found on page 33.

Dwarf Apricots

Enjoy these taste tempting, luscious fruits right from your own back yard every year. These are small trees that can be planted close together, about 6 to 8 feet, and a ladder is never needed for pruning or harvesting. Apricots do well wherever peaches are grown.

EARLY GOLDEN — MOORPARK

Heavy 3 to 4 ft. branched trees: \$3.95 each; 2 for \$7.75

Dwarf Nectarines

Trees look just like peaches, yet produce beautiful, luscious plum-like fruit so flavorful. Nectarines have long been a favorite with home owners but they presented a large maintenance problem. Now . . . Dwarf Nectarines take the same care as any other dwarf fruit. Enjoy the superb quality found only in nectarines by planting them this season.

GARDEN STATE (yellow)

REDCHIEF (white)

Heavy 3 to 4 ft. branched trees: \$3.25 each; 2 for \$5.95

Dwarf Cherries

✓ "NEW NORTH STAR"

Our Finest Dwarf Pie Cherry

Literally thousands of bright, shiny, mouth-watering fruits from these small trees each year will be yours. North Star trees bear early, and heavy beginning the second and third year. This variety is the most hardy sour cherry we have and will succeed farther north than any other cherry. It ripens along with Montmorency and Morello. Fruit hangs for about two weeks in normal seasons.

3 to 4 ft. heavy branched trees: \$3.95 each; 2 for \$7.75

Dwarf Plums

Beautiful Flowers — Delicious Fruit

Just about all one could expect from any tree. These very small plum trees make a fine addition to any home garden. Dwarf plums can be cared for the same as peaches, grow most anywhere, and can always be reached from the ground. Plant them 6 to 8 feet apart for wonderful results.

Fellemburg

Satsuma

Santa Rosa

ORIENTAL PERSIMMONS

EXTREMELY BEAUTIFUL — HIGHLY DELICIOUS

THIS OUTSTANDING PLANT IS TAKING THE HORTICULTURAL WORLD BY STORM

WE SPECIALIZE IN THE VERY HARDIEST VARIETIES

ATOMA Tree of this new hardy type is strong, vigorous in growth and a good bearer. The fruit is large, oblate with well defined quarter marks, skin orange-yellow changing to dark orange with a delicate bloom and waxy appearance: light clear flesh when ripe. Loses its astringency when ripe and of high quality. Hangs well.

FUYUGAKI Fruit of this variety is never astringent. It is edible while still hard and may be peeled and eaten like an apple. It keeps well and quality is of the best. Fruits are medium in size, rather flattened, beautiful deep red color, and a very prolific bearer.

HYAKUME The Hyakume persimmon is a large fruit of the black meat type. The tree normally grows to a height of about 10 feet producing a medium quantity of fruit of high sugar content. It is beautifully ornamental.

EUREKA A hardy variety with a most delicious flavor. Sometimes seedless. Big red-orange fruits literally covers the tree and hangs until soft and ripe. Slick, dark-green foliage adds to the ornamental value of this type grafted persimmon.

TANE-NASHI Large to very large, conical in shape. Light yellow changing to red as the fruit ripens. Flesh is astringent until fully ripe when it acquires a delightful flavor that is characteristic of the fruit.

Prices For All Persimmons:

3 to 4 foot branched, \$2.95 each;	3 for \$8.45
2 to 3 foot branched, 2.35 each;	3 for 6.25

Oriental Persimmons are one of the finest ornamental plants we know. They have beautiful, waxy green foliage through the summer which changes to rich, golden yellow streaked with red in fall. The trees are rather slow growers which makes them popular for small homesites. Tree characteristics of Oriental Persimmons are outstanding enough to merit space in any planting. Delicious fruit is an added bonus.

The Oriental persimmon is adapted to most regions in the South and can be raised successfully as far North as Penna. The trees are vigorous of growth and bear young.

FIG TREES

HEALTHY — EASY TO GROW — DELICIOUS

BROWN TURKEY Very hardy, dwarfish and prolific. Fruit medium size to large, pear shaped, skin copper brown, flesh white shading to pink, quality Good.

MAGNOLIA FIG One of the hardiest species, doing well where the winters are not too severe. Fruit very large and of rich straw color. Fruit begins to ripen the last of June.

Prices on All Fig Varieties:

18 to 24 inch	\$1.85 ea.	lots of 3, \$1.75 ea.
2 to 3 foot	2.15 ea.	lots of 3, 1.95 ea.

EVERBEARING TYPE Characteristics similar to the Brown Turkey, otherwise it starts to bear early in the season and continues to bear fruit into late fall. This variety is very attractive as to bush and is used much for ornamental purposes.

CELESTE Most widely planted of all figs in the south-eastern fig areas. It is hardy and can be grown where less hardy varieties fail. Fruit is medium in size, skin violet, flesh white to rose color, firm, juicy, sweet and of excellent quality.

HICAN TREES

(Pecan X Shellbark Hickory Hybrids)

CLARKSVILLE Trees grow with great vigor, symmetry and beauty. Foliage is dark green, makes a beautiful ornamental tree as well as producing large high quality nuts which are thin shelled and fine flavored. Trees are hardy in Northern areas.

GERARDI Tree grows very much like the Clarksville and is hardy in Northern areas. Nuts are often 2 inches long and about $\frac{3}{4}$ of an inch in diameter and very fine flavored with good cracking qualities.

PLEAS HYBRID is hybrid of pecan and bitternut hickory from Oklahoma. Tree is moderately strong growing; round-headed; a fairly early and moderate bearer. Nuts medium in size, fair cracker. A fine Timber and Ornamental Tree.

Grafted Hican Trees, 3 to 4 feet, \$5.95 each

2 to 3 feet, \$4.95

All Are Hardy . . . Disease Free . . . Reasonably Priced

NUT TREES

HARDY NORTHERN GRAFTED PECANS

BUSSERON originated in Indiana. Trees vigorous; self-fruitful; nuts large for northern varieties. Nuts are long; shell medium thick; fair cracker. Flavor good and very sweet.

MAJOR This is perhaps one of the best of the northern pecans, for growth, disease resistance and regular bearing. Very high quality nut, thin shell, small, plump, sweet. A splendid tree, starts bearing the 3rd or 4th year after transplanting.

GILES This pecan is somewhat larger than the Major and bears very heavy crops, usually starts bearing the 3rd or 4th year after transplanting. Tree more spreading than the Major, is disease resistant, very fine flavored nut.

COLBY This fine new variety originated in Illinois and was introduced commercially in 1957. It is a northern type nut maturing in 160 days and has proven very hardy in the Illinois area. The nut is long, oval, and of good flavor. It excels other extra early types in both size and productivity.

2 to 3 feet, \$4.95 each

3 to 4 feet, \$5.95 each

4 to 5 feet, \$6.95 each

GRAFTED PAPER SHELL PECANS

(Southern Types)

All our Pecan trees are grafted so as to give uniform type Pecans and bring them into bearing very young. We do not recommend seedling pecan trees at any price.

STUART PECAN Extremely hardy and a strong grower. Nuts of good size and well filled. Shell very thin and easily opened.

SCHLEY PECAN The Schley is thrifty, strong grower; nuts long, well filled, with a very thin paper-like shell.

FARLEY We list this selection with the assurance that it is self-pollinating and more hardy than most varieties, and seems to adapt itself to varied soil and climatic conditions from the far South to the Central Northern area.

DESIRABLE The Desirable is another selection which has been much recommended as a very productive and comparatively hardy self-pollinating variety suitable for home and commercial planting. We feel that the Farley and Desirable both are very desirable additions to the older established varieties of thin shelled pecans.

MAHAN This is probably the largest of all paper-shells (sometimes as much as 3" long) A vigorous grower, heavy producer, but does not fill well. Recommended for southern planting only.

SOUTHERN TYPE

GRAFTED PECAN TREE PRICES

	Each	3	10	20
2-3 ft.	\$3.75	\$10.80	\$35.00	\$68.00
3-4 ft.	3.95	11.40	37.00	72.00
4-5 ft.	4.45	12.95	42.00	82.00

NEW . . . HARDY GRAFTED CARPATHIANS

COLBY One of the hardiest varieties for the mid-west and middle Atlantic areas. This medium sized nut is thin shelled, cracks out in halves, has light meat, good flavor and quality.

LAKE This is one of the larger Carpathians having good quality, fine flavor. It cracks out in halves and has proven its hardness in the mid-west and middle Atlantic areas over the last ten years.

3-4 feet, \$5.95 each

2-3 ft., \$4.95 each

HARDY CARPATHIAN WALNUT SEEDLINGS

2-3 ft. only, \$2.95

ENGLISH WALNUT
Hardy Type

ENGLISH WALNUTS

Very Hardy Types — Large, Thin Shelled

English Walnut production is proving practical and desirable in the East Central areas. Plant Bountiful Ridge, Early Bearing Trees.

Tree valuable for its fruit and shade. The nuts are thin shelled with fully meated kernels of delicious flavor. Tree is hardy and productive.

2 to 3 feet, \$2.95 each; 3 for \$8.50; 3 to 4 feet, \$3.95 each; 3 for \$11.50

Chinese CHESTNUTS

Early Bearing, Fast Growing, Blight Resistant Trees

We highly recommend planting Chinese Chestnuts on hill sides, in pastures, on roadsides, in barnyards, in lawns, and in areas where general farming operations fail because of topographical conditions for beauty, shade and delicious nuts. Blight resistant Chinese Chestnut trees will thrive on most any site which will support other tree vegetation.

Chinese Chestnuts are early to bear and give quick profits. Many growers are now receiving fifty to ninety cents per pound for their nuts. Others with only a few trees are supplying their own needs with ease. You, too, can enjoy them with a minimum of expense and care. Write for our Up-to-date cultural directions on BLIGHT RESISTANT CHINESE CHESTNUTS.

We are offering the finest types of hardy, blight resistant and high quality chestnuts our Government representatives could find in the great chestnut producing areas of China.

HALL'S HARDY ALMOND

New — Beautiful — Delicious

A fine new plant with beautiful blooms and delicious nuts. Hall's Almond thrives where peaches are grown, growing rapidly and bearing heavy at an early age. It is a fine dual purpose plant and can be added to most landscape plantings with ease. Best results are obtained when two or more trees are used.

4-5 ft.	Each \$2.95	2 for \$5.50
3-4 ft.	Each \$2.50	2 for \$4.50

SHAGBARK HICKORY

(Seedlings)

Beautiful trees for shade, home, or orchard planting. Shagbarks thrive on marginal soils and are adapted to growing from north Florida to New England and west. Nuts are creamy-white, sweet, hard but thin-shelled. Trees are somewhat slow growers, but exceptionally durable.

18-24 inch plants	\$2.95	2-3 ft. \$3.95
-------------------	--------	---------------------

HEARTNUT

(Varietal form of the Japan Walnut)

Our selection is a seedling of the well known Canoka, which is one of the most rapid growers of all nut trees, bears young, often the third year. Bears annual crops, cracks easily, the kernels coming out mostly in whole halves.

2 to 3 feet, \$2.50 each	3 to 4 feet, \$3.50 each
--------------------------	--------------------------

JAPAN WALNUT

Valuable as a shade tree. Nut has comparative thin shell. Kernel flavor similar to white walnut. Used largely as a pollinizer for English Walnuts. Our Japan walnut is a very selected type.

2 to 3 ft., \$1.95 each; 3 to 4 ft., \$2.35 each
--

THOMAS BLACK WALNUTS

(Grafted For Your Insurance)

One of the largest and finest Black Walnuts yet found. Kernels large, light colored; nearly all crack out in whole halves. Tree extremely vigorous and hardy.

2 to 3 feet, \$2.95 each; 3 for \$8.50
3 to 4 feet, \$3.65 each; 3 for \$10.50

AMERICAN FILBERT (Hazel Nut)

The family favorite, attractive bush, yielding abundant crops. Bears young. Does not grow a large tree.

2-3 ft., \$1.95 each; 3 for \$4.95

BOUNTIFUL RIDGE FILBERT TREES

ROYAL This fine new filbert bears large, glossy, well filled nuts in profusion. It needs pollination from either Barcelona or DuChilly for best results. Recommended for trial where other filberts are grown successfully.

BARCELONA FILBERT Possibly the most widely planted type for commercial plantings in the Northwest. Larger than the native filbert, heavy and consistent bearer.

DuCHILLY FILBERT Widely used to pollinate other types. Nuts are large and attractive.

RA-PID-GRO

THE NEW EASY TO USE ALL AROUND LIQUID FERTILIZER

Spray it on Your Trees — Plants — Vegetables — Use as a Dip to Roots When Planting — Add to Spray Solutions or When Applying Water. Good for Anything That Grows

RA-PID-GRO is an approved formula containing Nitrogen 23% — Phosphoric Acid 21% — Potash 17% in combination with Vitamin B1 and B2 along with other elements necessary for normal plant growth.

RA-PID-GRO is shipped in dry form and water is added by the user to make one of the finest plant foods which can be purchased. One pound of RA-PID-GRO makes 22 gallons of the quickest acting fertilizer ever used for dipping stock when planting and putting around all plant growth. Makes 44 gallons of liquid for spraying on foliage. It will not burn when applied as a spray. It is 100% effective as it contains no inert material.

Follow full directions included with every shipment for best results.

RA-PID-GRO PRICES

Twenty-five pounds	21.00

PRATT'S ROSE DUST or SPRAY

This convenient dust gun is loaded with an all-purpose formula. Non-poisonous, synergized pyrethrum and rotenone kill garden insect pests. The protective copper and sulfur dusts ward off black spot and other common fungous diseases. Packed in 1/2 lb. dust gun. The same formula is packed in 1 and 3 lb. sizes and used as a wettable spray. 1 lb. makes 10 gallons spray. 1/2 lb. gun. \$1.00; 1 lb. \$1.00; 3 lb. \$2.35. Not Postpaid.

PRATT'S SCALECIDE

The oldest and best known dormant oil spray for fruit trees, shade trees, and ornamentals. A 96% highly refined miscible oil meeting state specifications for superior type oil. Dormant spraying with Scalecide at half the concentration required for regular oil gives safe, effective control of scale, aphid, red mite, spruce gall, red spider and similar over-wintering insects. For orchard spraying and egg type of scale use 3 gallons per 100, for shade trees 2 gallons and evergreens 1 gallon. 1 qt. \$1.39; 1 gal. \$3.25. Not Postpaid

PRATT'S FRUIT TREE SPRAY or DUST

A combined insecticide and fungicide containing 62% sulfur, 7.50% DDT, 14.40% basic lead arsenate. Used for the control of majority of insects and fungous diseases on apples, pears, peaches, plums and ornamentals. An all-purpose dust or spray for fruit trees whereby it is possible to control chewing insects and fungous diseases with a single material. May be used as dust or diluted with water for spraying. 1 lb. makes 8 gallons spray. 1 lb. \$1.00; 3 lb. \$2.35. Not Postpaid

PRATT'S LIQUID ROSE SPRAY

A complete insecticide, fungicide, and miticide formulation in a concentrated liquid form. Controls most common insects and diseases affecting roses and other flowers. Dilute with water at the rate of 1-200 (4 tsp. per gal.) for insect control or 1 oz. per gallon for disease control. Will not clog sprayers.

1 pt. \$2.50. Not Postpaid

PARA-SCALECIDE

A liquid paradichlorobenzene treatments for control of peach borers and other borers affecting fruit and ornamental trees.

Pour 1/2 to 1 1/2 pints of diluted Para-Scalecide (1 to 7 parts of water) around base of affected peach tree in early Fall or late Spring.

Kill borers on rhododendrons, apples, etc. by applying diluted Para-Scalecide in borer holes with force-feed oil can.

1 qt. \$2.00; 1 gal. \$5.00. Not Postpaid

PRATT'S SPRAY FOR EVERGREENS

An emulsifiable insecticide-miticide concentrate that will kill all common insects affecting evergreens, shade trees, ornamentals and flowers. For professional insect control on these plants, apply Scalecide in the Spring, before the new growth starts, followed by bi-weekly use of Pratt's Spray for Evergreens throughout the season after the new growth starts. (8 ozs. makes 15 gallons).

1 pt. \$2.50. Not Postpaid

The Bountiful Easy Payment Plan

"Pay While They Grow"

We offer this easy method of payment so our customers may plant all the plants they need and still stay within their budget requirements. Completely landscape your home or bring orchard plantings up to date at proper planting time.

Shipment of all time payment orders will be delayed a few days while references are checked. Please place your orders early so Nursery Stock will arrive at proper planting time.

DELAWARE One of the highest quality grapes in cultivation. Extremely hardy. Adapts itself readily to various conditions. Matures its crop early. Has very attractive appearance. Keeps and ships well and is immune to black rot. Clusters are well shouldered, compact, light red.

CONCORD The standard by which all the other black grapes are judged. No vineyard is complete without a liberal planting of Concord. Our Concord vines are well rooted and are guaranteed to give perfect satisfaction, producing huge quantities of deep purple grapes of fine flavor.

CATAWBA Bunches medium, shouldered; grapes, large, deep coppery-red, juicy, sweet, rich.

CACO (Red) Is of the highest quality, being so rich in sugar and excellent flavor, it can be eaten two weeks before it is ripe. The grapes are very large, bunch good size, compact and good form. The vines are strong growers, hardy and prolific. Ripens one week before Concord.

FREDONIA The earliest good black grape. The vine is vigorous, hardy and productive and ripens its fruits two weeks earlier than Worden. The clusters are medium size and compact. The berries are large and round; the skin is thick and tough, the flesh is juicy, solid but tender and very good quality.

SHERIDAN A late-keeper to extend the Concord season. Under similar conditions the plants are just as hardy, vigorous, healthy and more productive than Concord. The bunches are large and compact; the berries are large and very firm; the flavor is sweeter and richer than Concord. Ripens week later than Concord.

PORTLAND Holds first place among grapes as an early green variety. Vine very vigorous, hardy and healthy. Bunches and berries larger than any other green grape. Very fine quality.

NIAGARA Occupies same position among the white varieties as Concord among the black. Bunch and berries are large, greenish-white changing to pale yellow when fully ripe. Skin thin but tough; quality much like Concord.

STEBEN Its blue-black fruit ripens just after Concord in long, tapering clusters which are compact and often shouldered. The berries have tough skin, are sweet, medium size, heavily bloomed, and keep well in cold storage. Vines are vigorous, hardy, and productive.

WORDEN Seedling of the Concord, which it greatly resembles. Ripens several days earlier.

GOLDEN MUSCAT Possesses the rich golden color of Diamond and the fine muscat aroma of the European Muscat. For home use or roadside market it is one of the best. Vine vigorous and productive. Clusters large, berries handomest and best flavored grapes grown in eastern America. Ripens after Concord.

SHERIDAN GRAPE

MUSCADINE TYPE GRAPES

Pre-eminently a grape of the south, grows luxuriantly from Delaware to the gulf and west to Texas. Vines vigorous, productive and much used for screening purposes.

SCUPPERNONG Fruit borne in small clusters of large berries which ripen unevenly, a desirable trait for southern sections. Skin is thick, tough, with many russet dots, reddish bronze, flesh pale green, juicy, foxy, sweet to agreeably tart; fair to good. Sterile.

HUNT Vines vigorous, medium heavy foliage. Fruit large, black, hangs well, skin medium to thin, pulp medium, excellent flavor. We class this the best of all black varieties. Sterile.

DULCET One of the best eating varieties. Clusters large, fruit reddish purple, medium size, quality excellent, hang to vine well after full ripe.

YUGA Best of the all-purpose varieties. Clusters large, fruit medium, skin is thin and light, bronze color, quality excellent, ripens about October 1st. Hangs to vine well after ripening. Recommended highly.

MALE POLLINATOR Must be planted with all Scuppernong varieties not blossom fertile. The male vine bears fruit but is used for pollinating purposes since its flowers are self-fertile. One vine will pollinate up to ten vines.

ROBERT'S STRAIN MARY WASHINGTON

Developed by selection from the original Mary Washington. It is a new type possessing very large spears, giving heavy yields, and having exceptional vigor. The most RUST-RESISTANT strain offered to the planter today. ROBERT'S STRAIN is being accepted by the large commercial planters of the east almost exclusively for their new plantings.

MARY WASHINGTON

The old stand-by of asparagus planters. A strong grower with large stock, attractive green color and rich, tender spears. Also RUST-RESISTANT and recommended for planting in most all localities. Bears early and with heavy yields.

.35	\$1.50	\$2.50	\$5.50	\$10.00	\$18.00

MCDONALD RED

This type is recognized as one of the best RED RHUBARBS now offered. It is suitable for field growing or Forcing. The plants are healthy, strong growers, producing long deep red to pink ribs of very fine flavor. If a definite RED RHUBARB IS WANTED WE RECOMMEND THE McDONALD.

CHIPMAN'S CANADA RED

This splendid type Rhubarb is rapidly becoming a favorite of the Red Types. It is unique in that the entire rib is a pleasing Cherry Red all the way through, having a pleasing Rhubarb taste when prepared for serving. The ribs are not quite as large as some other Rhubarb but its color and flavor sells it readily.

Each	3	5	10	25	50
\$1.00	\$2.85	\$4.50	\$8.50	\$18.75	\$32.50

BLACKBERRIES

EBONY KING

The sensational new, heavy bearing blackberry that is proving superior because of its ability to bear consistent heavy crops. Also contributing to the popularity of this fine variety is the fact that non-bearing plants are easily distinguished and may be removed from the planting when necessary. Berries are large, glossy-black, with very high dessert quality. Fruit is suitable for processing, home use, and for fresh fruit markets. Fruit ripens early. Plants are thrifty and hardy.

THE EBONY KING BLACKBERRY

BOYSENBERRY

A giant of the blackberry type. More flavorful than the blackberry and can be picked over a longer period of time. Yields are extremely high. The plant is a vigorous grower and should not be planted closer than six feet apart and seems to do much better when trained on wires similar to grapes. Plants are especially resistant to disease and drought. Try them this year.

THORNLESS BOYSENBERRY

Has the same characteristics as the Boysenberry except for the fact that the vines are THORNLESS. Can be easily handled at all times without gloves.

LAVACA BERRY

A seedling of the Boysenberry, resembling its parent most but having higher production, larger berries, and more resistance to cold and disease. The berries are firmer, less acid, and higher general quality. It is superior for freezing. We feel it to be a handsome addition to your small fruits planting.

PRICES FOR LAVACA BERRIES, BOYSENBERRY AND THORNLESS BOYSENBERRIES

(One Year, No. 1 Plants)

6	10	25	50
\$2.15	\$2.70	\$4.95	\$8.55
100	250	500	
\$14.85	\$32.50	\$51.75	

NOTE: Often Blackberry plants bloom prolifically but produce small, mis-shapen fruit. Generally, the Tarnish plant bug is responsible. You may control it by using DDT, BHC. Parathion spray or dust beginning just before bloom and continuing as close to harvest as the safe tolerances for the chemicals will allow.

HEDRICK

Introduced by the New York State Fruit Testing Cooperative as a promising new blackberry warranting extensive trial for home and market use. Plants are vigorous, productive and hardy. The berries are large, medium firm with no core. The flavor is sub-acid. Ripens in late July.

BAILEY

A New York State introduction which is promising. Plants are vigorous, productive and hardy. The berries are somewhat larger than the Eldorado, moderately firm, without core, sub-acid, and of good quality. Ripens in early August about one week later than Hedrick.

PRICES FOR ALL BLACKBERRY PLANTS

A DEPENDABLE SOURCE OF INCOME TO EVERY SMALL FRUIT GROWER

CUMBERLAND (Black)

Cumberland stands as America's leading black raspberry. It is the choice of the commercial growers in the central and northern regions. One of the largest of the Black Caps; plants are healthy, vigorous growers, throwing up stout, well branched canes that produce immense crops of magnificent berries. The fruit is large and holds up well during the picking season. very firm and rated as one of the most delicious of black caps.

NEW MORRISON (Black)

Large size, very disease resistant, firm, consistent bearer.

Berries are extremely large, many measuring over $\frac{3}{4}$ inch in diameter and they do not crumble. A little later than Cumberland, has fine dark glossy color and berries hold up well after picking, having exceptional good quality. A worthy new variety.

Be Assured of Quality

Our raspberry plants are dug early while dormant. They are put in our refrigerated storage where they are kept with proper moisture at about 34 degrees F. Our years of handling raspberry plants and our modern storage enable us to offer our customer PLANTS WHICH WE KNOW WILL GIVE SATISFACTION IN EVERY WAY.

BLACK HAWK (Black)

Hardy NEW Introduction Worthy of Trial
Vigorous — Productive

Black Hawk originated in Ames, Iowa. It is a very large, nearly round, non-crumbling, firm berry. Black Hawk stands up well under commercial handling and the quality is excellent whether used fresh, frozen, or in jams, pies, or sauces. Flavor is sweet to mildly acid. Its picking season lasts from 10 to 14 days. The bush is vigorous, very hardy, and highly productive.

NEW LOGAN (Black)

One of the New Logan's outstanding characteristics is its resistance to mosaic and other raspberry diseases. The berry ripens one week earlier than Cumberland. It is a heavier yielder and the glossy black berries are as large. It holds up well through drought, the last picking as fresh and free from seediness as the first.

A thrifty grower, and, although not as upright as Cumberland, our growers find this no objection if the summer shoots are topped higher than normal.

BRISTOL (Black)

Growers pronounce this one of the best to precede the Cumberland.

Bristol is one of the best Black Raspberries being grown. It ripens just before Cumberland a few days. The berries are large and firm, fairly glossy and very attractive. The quality is one of the best. The bushes are very hardy and a vigorous grower. The Bristol rates as one of the heaviest bearing Black Caps now known. From observation and reports coming to us, we can recommend it highly to planters for either commercial markets or home use.

INCREASE PRODUCTION WITH BOUNTIFUL RIDGE GROWN

RED RASPBERRY PLANTS

LATHAM

Leads all Red Raspberries in Commercial Planting
and Profits to the Grower

The popular mosaic free, hardy raspberry. Without question Latham is the most profitable Red Raspberry for commercial planting. It is absolutely hardy. It cannot be surpassed in productiveness. Due to its rich brilliant red color it sells readily on market stands, is a delightful table berry and almost perfect for canning. The berries are large, round and unusually firm, exceptionally well suited for shipping to distant markets. It ripens evenly over a long season.

SUNRISE

Combining Earliness — Hardiness — Quality

This berry ripens 10 to 16 days earlier than Latham. Its size is near the size of Latham.

It has been very resistant to anthracnose, leaf spot, cane blight, and the resistance shown is probably one of the important factors in its ability to withstand low temperatures.

The color is bright red but turns dark red on ripening — the berries pick easily. They are firm, fine texture, juicy, non-crumbling, sub-acid in flavor with good raspberry aroma, and better in quality than Latham.

Taylor Red Raspberry

DISEASE RESISTANT — HIGH QUALITY
Recommended To Precede Latham

This beautiful berry should have the consideration of every commercial raspberry grower.

The plants are vigorous, hardy, productive, tall growing and make new plants rapidly. The sturdy canes hold the berries well off the ground. The berries ripen shortly before Latham, are large, long conic, bright attractive red, thick fleshed, very firm, sub-acid and of excellent quality, being superior to Latham. The berries do not cling to the bush and carry well to markets.

Everbearing

RED RASPBERRIES

INDIAN SUMMER

High Quality — Early Season — Heavier Fruiting —
Hardier — More Disease Resistant.

The quality is good and the season very early, starting a day or two later than June varieties. The fall crop commences in mid-September, continuing until stopped by hard freezes in November. The bulk of the crop is borne in October. The plants are above medium to tall, vigorous, upright, hardy, healthy, productive. Fruit is large and uniform, maintaining size throughout the season. Roundish-conic in shape, cavity of medium size, smooth light bloom, color medium red, juicy, tender, mild sub-acid good.

MILTON (Red)

Disease Resistant — Best Variety to Follow Latham

Milton ripens two or three days later than Latham and is a fine berry for home or market use. The berries are large, brilliant red, non-crumbling, mild sub-acid in flavor and good. The plants are vigorous, productive, hardy, and have remained free of mosaic.

LATHAM Raspberries—outstanding for size, yields & quality. Plant them this year.

SEPTEMBER

A NEW EVERBEARING RED RASPBERRY
HEAVY PRODUCER — WORTHY OF TRIAL

The plants are vigorous and disease resistant. The berries are shaped similar to Latham, bright red, firm, not crumbling. Ripens its fall crop 2 to 4 weeks earlier than Indian Summer and continues until frost. The spring crop ripens early and plants are very productive.

New Amber Raspberry

DELICIOUS — NOVEL

Amber is an outstanding new raspberry for the novelty market and home gardener. Introduced by the N. Y. Exp. Station. It is amber in color, sweet flavored, of good quality, and does not crumble. Berries are large. Amber ripens late and extends the season for home grown raspberries.

BLUEBERRIES

THE ARISTOCRAT OF THE BUSH BERRY FAMILY!

A Treat to The Nation — They Can Be Grown in Most All Sections of The Country. Plan and Plant This Large Size, Fine Flavored, Wonder Berry. Beauty of Leaf and Wood Makes The Plant Very Ornamental

NEW, RECENT INTRODUCTIONS

EARLIBLUE Fruit clusters medium size; berries oblate; light blue; very firm; sub-acid; flavor very good. Earliblue ripens early with Weymouth and June, the bushes are upright, very vigorous, well shaped and good producers.

BLUERAY The fruit is large with a medium light blue color, medium scar, fine flavor, and resists cracking. It matures with Ivanhoe and Rancocas and most nearly resembles Dixi. The bush is hardy and very productive.

IVANHOE Fruits are large, attractive, slightly later than Stanley with a good blue color. Flavor is good. Plants are vigorous, productive, and more tolerant of canker than Stanley.

BLUECROP Fruit clusters of Bluecrop are large, berries that are roundish—oblate; color very light blue; very firm; sub-acid; flavor good. Bluecrop ripens in mid-season with Concord, Pioneer and Atlantic. Bush; upright and vigorous; very consistent producer.

BERKELEY Fruit is light blue color and considered one of the largest blueberries yet introduced. Berries are not subject to crack, ripen about a week after Stanley. Plants are very productive.

HERBERT Fruit clusters are loose; fruit ripens about the same time as Jersey and Dixi, earlier than Coville but later than Berkeley. Berries of Herbert are large and carry their size well through ripening season; firm; resistant to cracking; color about the same as Jersey, Rubel and Dixi; flavor is equal to the best varieties; hang well on bush. Bushes flower late, are thrifty growers and consistently productive.

We suggest from eight to twelve plants for a family of 5 people. Ask for and follow our free cultural directions. Plant our Blueberries this year for pleasure and profit.

STANLEY A recent development recognized in New Jersey Blueberry sections as one of the outstanding Blueberries. Vigorous plants, large berries, very productive.

RANCOCAS The bush of slendor, vigorous, upright habit rarely surpasses six feet in height. The winter twigs are a dark red. The berries are somewhat larger than those of Rubel and begin to ripen several days earlier.

Blueberry Clusters at ripening time reveal the productivity of this wonder berry. Large in size—Beautiful to look at—Marvelous to eat.

BLUEBERRIES

PROFITABLE . . . DELICIOUS Our Plants Are Ready to Bear

CONCORD The bush is upright and at maturity exceeds six feet in height. The young growth is bright red in winter. The berries are large, frequently reaching $\frac{3}{4}$ of an inch in diameter. They usually ripen a few days earlier than Rubel and are fine in flavor and appearance.

ATLANTIC Late mid-season. A cross between Jersey and Pioneer which has two outstanding traits—one being its superior size and non-cracking during wet weather—the other is its handsome color and fine flavor. A heavy producer fruiting about with Rubel but much larger in size, better in quality and flavor. Requires less time to prune than Rubel.

PEMBERTON One of the newer varieties being outstanding for its vigorous growth and heavy production of large to very large fruits. Berries are firm, having slight aroma and fine dessert quality. Ripens mid-season.

RUBEL Well developed bushes stand six feet or more high, vigorous and beautiful. The stems are slender, but sturdy. The winter color of the young wood is a rich red. The large berries are of a fine blue color. Planted extensively for commercial fruit production.

JERSEY The bush is vigorous and large. The winter color of the young growth is a light red over a gold brown. The berries are the largest of any here listed, of a very light color and ripen the same time as Rubel.

DIXI Bush vigorous, open, spreading, productive. Berry very large, fair blue color, firm, good dessert quality. Late mid-season.

BURLINGTON The picking quality of Burlington is superior due to complete separation of berry from stem. It ripens later than Jersey or Rubel. The fruit is above average dessert quality. The bush is erect, vigorous and healthy. The berries are a good blue color, medium to large and hold up in size to the end of the season.

COVILLE Selected to give larger berries of good quality and color. Ripening after Dixi, Rubel and Jersey, Coville is rated as our latest berries, large, good blue color, good quality, hangs well to clusters even when ripe thereby requiring less picking and having thrifty plants.

BLUEBERRY CLUSTER

The large cultivated Blueberry has unlimited possibilities as a fresh or a canned berry. They have a place in every farm and home garden lot. We list the best of the present day varieties.

Blueberries require an acid soil containing an abundance of peat or other partially rotted vegetable matter. They need a moderate supply of soil-moisture, and good drainage.

SURECROP

MULTIPLE RESISTANCE TO RED STELE — FINE FLAVOR

VERY HEAVY PLANT PRODUCER

Excellent Size . . . Good Yields . . . High Prices

SURECROP is a really fine new strawberry variety wherever grown from Pennsylvania and New York to southern Virginia and westward to Ohio.

SURECROP is a mid-season berry ripening about with Fairland and Temple. The berries are a light, bright red which turns to a deep rich color. The seeds are a nice bright yellow set even with the surface. SURECROP berries are firm with a tough glossy skin which makes them ideal for distant markets. They have also been recommended for freezing. Size holds well throughout the season with the average being larger than Stelemaster.

SURECROP are very vigorous plant makers and producers, rivalling such varieties as Pocahontas and Robinson as the best bed makers of all strawberry varieties. Coupled with STELEMASTER as a fine early berry, SURECROP as a mid-season berry will deliver a MONEY-MAKING, RED STELE RESISTANCE PUNCH for growers everywhere.

Beautiful large berries make Surecrop a real challenge to the mid-season kinds. A high seller on 1963 markets everywhere.

MIDWAY

New . . . Widely Tested . . . Red Stele Resistant

Merits Trial in all Areas

Midway is a cross of Dixieland and Temple that has done well in test plots from Massachusetts to Virginia and Westward. It should be tested as a virus free, red stele resistant replacement for Temple and Fairland, neither of which has virus free stock available.

Midway ripens in mid-season about with Temple. The berries are medium to large size, have a uniform deep red color with a glossy surface, firm skin and yellow seeds. The flesh is firm. Berries are irregular conic shape but have good dessert quality and have stood up well in the frozen pack.

Plants of Midway are vigorous, highly productive, and resistant to the common race of red stele. The leaves are somewhat susceptible to leaf scorch and leaf spot.

Growers report 1963 crops of Midway were excellent in yield, color, size. Buyers paid high prices for fruit because it carried long distances with a minimum of loss.

POCAHONTAS

The Three Way Strawberry

FRESH MARKET . . . CANNED . . . FROZEN PACK

Outstanding . . . Wonderful . . . My Best Money Maker . . . These are the words used by many of our customers to describe the way they feel about this great berry. Since its release by the U.S.D.A. Pocahontas has climbed to the top of the ladder as a commercial favorite. Time after time it has out yielded all other kinds from the Carolinas to New York and as far west as Ohio and Arkansas. Its extra high vigor gives Pocahontas good picking beds even under adverse conditions.

Yields of Pocahontas often are more than 10,000 quarts of large, beautiful, high quality berries. They have brought high profits on fresh markets everywhere. Pocahontas has been accepted by the processors as an outstanding berry for canning and freezing.

The berries are a bright, glossy red; firm; somewhat conic in shape; and not as tart as Blakemore. Pocahontas ripens about a week later than Blakemore.

Pictured above is a basket of Pocahontas berries. Note the large size and nice color.

MORE MARKET LEADERS . . .

TENNESSEE BEAUTY

Very Firm . . . Large Yields

A Favorite Wherever Berries Are Grown

Tennessee Beauty is being grown in nearly every Eastern and Mid-Western berry section with the same results . . . **LARGE YIELDS AND HIGH PROFITS.** Berries of Tennessee Beauty are large (size holds well throughout entire season) firm, and outstanding shippers. They are a bright, glossy red holding well without changing color. Tennessee Beauty are of high quality and in demand for processing and freezing as well as for use on fresh markets. They ripen late-mid-season to late and are sure croppers.

Plants are vigorous and free plant makers always assuring good picking beds of large stocky crowns. Tennessee Beauty can be grown on a wide variety of soils with good results. We recommend Tennessee Beauty as a sure profit maker in most all Southern, Eastern, Northern, and Mid-Western producing areas.

EARLIDAWN

EARLINESS — FREEZING QUALITY — HIGH YIELDS

Ripening five days before Blakemore and Premier, EARLIDAWN is the earliest of all the good, commercial strawberry varieties. Year after year it has come through with early, large crops of nice market berries.

The berries are quite firm with a tough skin. Color is a vivid red only slightly darker than Blakemore which does not become too much darker upon holding. Crops of EARLIDAWN have been outstanding in all areas with as much as 58% of the crop being harvested in the first week on this fine new variety.

EARLIDAWN makes extra large crowned plants but not too many runner plants yet production is still quite high for such an early berry.

Note the Fine Shape of Jerseybelle

JERSEYBELLE

Virus Free Vigor And Rich Market Quality

Gave Fine Crop And High Prices In 1962

Jerseybelle has brought the highest prices paid for strawberries anywhere since its introduction a few years ago. Jerseybelle has risen to prominence as a highly profitable late-mid-season berry for the growers of New Jersey and Long Island. The berries are bright orange red, glossy and firm, turning slightly darker upon holding. Jerseybelle has been found best for moderately close and local markets.

Plants make good growth on rich, moist soils giving good picking beds of large, stocky crowns. However, they are not nearly as vigorous as Sparkle, Catskill or Poca-hontas. We recommend Jerseybelle for trial in most Eastern areas. It has not been found to be very adaptable to Midwestern growing conditions where observed.

Our Best Flavored Early Berry Brings Highest Prices, Too

MIDLAND

Beauty . . . Size . . . Productivity . . . The Flavor King

Midland from Virus Free Stocks is now surging back as one of the leaders of early strawberry varieties. Always a favorite as an early berry with outstanding size, beauty, productivity, quality, firmness and freezing ability, Midland can now be profitably grown due to the increased vigor of Virus Free Stocks. Midland will now make good beds of large vigorous plants.

Berries are early, ripening with Premier and Blakemore, and as productive as either, averaging somewhat larger in size. The flavor compares favorably with Fairfax, known generally as our highest quality berry. Freezing tests show Midland to be one of the best either for commercial or home use. We suggest you try this fine variety this year and see if you don't agree that it is most outstanding.

✓ SPARKLE

**A Very Heavy Producer
GOOD FOR FREEZING, TOO**

Sparkle is a prolific plant maker with good healthy foliage and very productive. Berries are medium size, uniform in shape and have a bright red color, turning somewhat dark on fruits that are over-ripe. The quality of the berry is excellent. Ripens mid-season, being a little later than Premier. Requires good moisture for best results. Sparkle is grown extensively in N. J., Eastern Penna., New York and New England States.

✓ KARDINAL KING

Kardinal King has created something of a sensation in Michigan by producing record breaking crops which out-sold all other varieties in competition. Buyers praise it for high shipping quality. Does equally well for canning and freezing.

The plants grow large, making wide fruiting rows. Berries ripen slightly after Premier and continue through the late season. The fruits are large solid red, juicy and sweet.

✓ EMPIRE

Heavy Bearer — Frost Resistant

Empire is a medium early, outstanding berry for the middle and northern berry producing areas. It is beautiful; larger than Premier; firmer, better carrier, more attractive and a higher yielder than Premier. Empire has always been a vigorous grower. Virus free stocks make it even easier to get good fruiting beds. The high yields of large, glossy, red fruit are making this fine berry very popular in the Premier growing sections of the country. Why don't you try some from Bountiful Ridge this year?

✓ CATSKILL

ONE OF THE VERY GOOD MID-SEASON BERRIES

A vigorous grower; somewhat frost resistant, extremely healthy in this latitude. It is a good plant maker and very productive. The berries are large and of good quality. We recommend Virus Free Plants of this fine variety for this mid-season variety for the Northeast. See outstanding color

productive; berries very large and good quality. It has been the best mid-season berries in cultivation. The foliage is productive. The berries are large and of good quality. This and the more northern areas. Catskill is the Number One picture on cover.

REDGLOW

✓ REDGLOW

**BEAUTY — PRODUCTIVITY — LARGE SIZE
RED STELE RESISTANCE**

REDGLOW is one of the most beautiful strawberry varieties we have seen. The fruit ripens in early mid-season with beautiful large, bright red berries which hold their size throughout the season. The berries are fairly firm and good flavored making them adapted to freezing and sale on the fresh market.

REDGLOW plants are vigorous and resistant to the most common type of red stele. REDGLOW has been tested from Pennsylvania south to North Carolina and westward to Kentucky and Indiana. We suggest plantings of this fine new berry anywhere in the general strawberry producing areas.

✓ DIXIELAND

Early . . . Vigorous Grower . . . Good Yields

Dixieland is making a steady climb to stardom since its introduction just a few years ago. Originally thought to be best adapted to southern areas, it is doing quite well in many northern producing sections. Dixieland ripens with Blakemore, is slightly firmer than Blakemore and has large berries. The berries are a bright glossy red only slightly darker than Blakemore and uniform in shape. Flavor is tart and good. Yields have run over 9000 quarts per acre of good, large, firm berries.

A genetic variegation (Spring yellows, June yellows) has developed in the variety Dixieland. This is not a virus. Plants are weakened and yields are reduced. There are no known sources of Dixieland free of spring yellows. Attempts are being made to locate non-yellowing stock. Thus, we can make no guarantee as to performance of Dixieland.

Because of genetic variegation, Dixieland has been taken out of the Virus Free program and can not be sold as Registered Stock this season. As soon as Virus Free clones of this variety are available, we will offer them for sale.

BEST GARDEN RESULTS From Virus Free Plants

✓ **ARMORE**

Very Large . . . Highly Productive
Vigorous Grower

This amazing berry is being successfully grown all through the mid-west. Its large size and beauty have made it quite popular and profitable. In our fruiting plots it showed up very well; giving very large, firm, and beautiful berries in an extremely wet spring.

Armure is a late mid-season kind with an outstanding future, we believe. Plants are very vigorous, easy to get good producing beds. Berries are light red and firmer than the Premier and Sparkle. Quality is good.

✓ **BLAKEMORE**

Virus Free — No Yellows — Strong — Healthy

It is a very free plant maker and responds quickly to good treatment. It is an abundant bearer, the fruit averages large and retains its bright attractive red color even after being picked several days. It will ripen a few days earlier than Premier. The foliage is healthy and vigorous. The plants hold up well during a drought. The berries are firm and unexcelled as long distance shipping berry and preferred by all Strawberry processing companies.

ONE OF THE MOST BEAUTIFUL BERRIES EVER

✓ **ALBRITTON**

Albritton is the most beautiful strawberry known to us. Berries are large, attractive bright glossy red, and ripen about with Blakemore. Berries are firm, carry well, and are of good flavor. Plants are vigorous, and productive. Albritton was introduced for the southern areas but demands trial in all areas where a real "eye-poppin' berry" is desired.

✓ **PREMIER**

It can be considered almost frostproof. The berries average large and hold up well under heavy crops and unfavorable seasonable conditions; it ripens over a comparatively long period, from two to three weeks; the berries have an attractive bright red color and unusual quality. It is moderately firm. It is one of the best of the tried and proven early varieties.

VIRUS FREE PREMIER are unusually vigorous and free plant makers. The foliage is lighter in color and the berries are lighter in color and possibly not as firm as the old type Premier but berries have Premier shape and quality.

✓ **REDSTAR**

Our Very Best Late Berry

Redstar is a sure bet to continue the good strawberry season. Its large, flavorful berries are certain to make a hit with your customers and family. They ripen a week to ten days after other berries are gone—so late that they are seldom hit by frost and annual crops are a certainty. The first berries are very large and wedge-shaped. Later ones are mostly conic. Flavor is delightfully good for such a late berry. The bright red color is quite attractive and darkens little on holding.

✓ **ROBINSON**

Large Size — Bright Color
A LEADING MARKET BERRY

Robinson, often called Scarlet Beauty, has those very large attractive berries which catch the customer's eye every time. They are a beautiful bright red color with glossy finish, holding well with little loss of color. Yields are comparable to other leading varieties.

Plants of the Robinson variety are very vigorous; almost always making good picking beds under extreme circumstances. Robinson actually does better in dry seasons than in wet ones because of the tendency to over produce plants. The berries also hold up better under dry conditions.

✓ **STELEMASTER**

Resistant To 3 Races of Red Stele.

Stelemaster ripens about with Blakemore. Berries are medium to large; hold size well throughout season. Generally uniform and smooth, medium red with a glossy surface. The flesh is light red, firm, juicy, and flavor is mild sub-acid. Stelemaster plants are vigorous, very productive and highly resistant to red stele known in Eastern U. S. Leaves are resistant to scorch but do leaf spot under some conditions. It should have the consideration of every planter where red stele is present in the soil.

✓ **FAIRFAX**

Queen Of The Table Berries

The Fairfax ripens about the same time as Premier, and its fruiting season extends over a long period. The quality of the Fairfax is equal to the best of our older varieties. The berries are large to very large, of a bright red color at picking time. It turns dark after being picked for several days but retains its flavor and firmness.

✓ **VESPER**

(NJ 157)

This fine new berry is the result of a cross of Utah Shipper & Jerseybelle which ripens later or about with Jerseybelle. It has a long harvest period that extends well into the Redstar season. The fruits are large and pretty. Vesper is the most productive of the selections tested at New Brunswick. It is a good plant maker but is not resistant to Red Stele or Verticillium wilt. From test results, it appears that Vesper will do well and should be tried in areas where Jerseybelle is successful.

Everbearing Strawberries

STREAMLINER

Public approval from many sections attest to its fine quality, rich color and real strawberry flavor. Includes a generous planting for year around goodness.

Streamliner adapts itself to most central and eastern growing conditions. Plants seem vigorous and produce good spring crops and bear almost constantly during late summer and fall. Berries are medium to large, rich red color throughout, having a real strawberry flavor. Streamliner makes a good fruiting bed and we recommend it.

SUPERFECTION

It's New — It's Beautiful — It's Good Eating
Plant Some in Spring, Pick Berries From
Late Summer Until Snow Flies

Now, fully tested, Superfection leads the field as the class of all everbearing varieties. The plants adapt themselves well to a wide range of soils without extra care and are free plant makers. The berries are large, firm, round and red. Flavor is good. Superfection produces well in spring, but excels in fall, giving large yields of beautiful, tasty fruit.

MASTODON

One Of The Finest Everbearing Varieties

It outyields some of our best June bearing sorts during their season and continues to bear throughout summer and fall. Berries of amazing size and superior quality, being very firm and attractive. For best results newly set plants should be disbudded up to July 1st. They will then bear 'til frost. They are grown very successfully by hill culture methods as well as matted bed row system. Where hill culture is practiced, set the plants 15 inches apart in the row and have rows from 2 to 2½ feet apart. This produces strong, robust hills that produce very heavily.

GEM

Gem is an old everbearing kind that has been the favorite of growers throughout the northeast for years. More vigorous virus free stocks have made it indistinguishable from Superfection and Brilliant. Whether you order Gem or Superfection, you may be assured of receiving the finest everbearer for the eastern areas.

REGISTERED (ESSENTIALLY VIRUS FREE) STRAWBERRY PLANTS

All strawberry plants from Bountiful Ridge bearing the label: Registered Essentially Virus Free; have been grown from Virus Free Foundation Stocks indexed by the U.S.D.A. in Beltsville, Md. They have been dusted 12 to 14 times with Parathion to control the vector of the virus diseases, fumigated twice with Nemagon for the control of nematodes, grown in well isolated areas away from fields of ordinary plants and nursery fields of varieties not yet available from virus free stock.

All of our plants have been abundantly fed with special fertilizer containing a minor element mix. Chlor-dane has also been added for the control of cut worms, ants and grubs which tend to make the plants less thrifty if allowed to go unchecked. Periodical checks have been made of planting stocks and nursery fields by competent inspectors to be sure that these plants are free of the Dangerous Red Stele Root Rot and other injurious diseases. The plants listed in this catalog as Registered (Essentially Virus Free) have been grown according to these specifications as prescribed by the Horticultural Department of the University of Maryland.

Buy and Plant Bountiful Ridge Strawberry Plants for Greater Success and Profits

Prices All Varieties Strawberry Plants

SHIPPING SEASON—We ship from November 1st to May 15th. Earlier orders cannot be accepted because plants will not be sufficiently dormant nor rooted until November 1st. All orders filled after May 15th will be at the purchaser's risk. We will make every effort to see that they arrive in good condition.

PRICES—All prices listed are F. O. B. Princess Anne, Md., and apply only to varieties listed. Several varieties cannot be combined to obtain a quantity rate. Please write for special quotations when in need of more than 5,000 of one variety.

POSTAGE—Please see special instructions on order blank.

OUR STATE INSPECTORS ISSUE SPECIAL STRAWBERRY PLANT CERTIFICATE

With existing plant diseases you cannot afford to take chances.

UNIVERSITY OF MARYLAND

College Park, Md.

STATE HORTICULTURAL DEPARTMENT

March 1, 1964

CERTIFICATE OF INSPECTION OF STRAWBERRY PLANTS

Duplicate of Number 2

This is to Certify, that the STRAWBERRY PLANTS OF THE BOUNTIFUL RIDGE NURSERIES, Princess Anne, Md., have been inspected in accordance with the laws of Maryland, 1898, Chapter 289, Section 58, and the Rules and Regulations promulgated by the State Horticulture Department, 1939, governing the inspection, certification and transportation of Strawberry plants within the State, that said plants are apparently free so far as can be determined by inspection, from the RED STELE ROOT ROT and other dangerously injurious plant diseases and insect pests.

This Certificate is valid until September 30, 1964, unless sooner revoked.
GEO. S. LANKFORD, Chief Inspector

L. O. WEAVER, State Pathologist

FLOWERING SHRUBS

FLOWERING ALMOND DOUBLE PINK. A beautiful tree; covered in May with rose-colored blossoms like small roses; hardy. 18 to 24 inch. \$1.00 each; \$2.85 for 3.

HYBRID FRENCH LILACS

Beautiful - Colorful - Fragrant
We List Only The Double Type

CHARLES JOLLY. Double, reddish purple. A heavy bloomer and thrifty type.

PRESIDENT GREVY. Double bluish lilac which has made it very popular. Very fragrant.

MME. LEMOINE. One of the most appreciated white hybrid lilacs. Flowers are double and borne in large panicles, shading to a creamy white. Plant is vigorous and hardy.

All French Lilacs

18-24 inch grafts, \$1.75 each;
3 for \$4.95

OLD FASHIONED LILACS

Everybody's Favorite
Beautiful Blooms in Purple and White

LILAC, WHITE (S. Vulgaris Alba). Too well known to need description; its flowers are white and fragrant. Fine 18-24 inch plants, \$1.75 each; 3 for \$4.95.

LILAC, PURPLE (S. Vulgaris). The well-known purple variety; always a standard sort. Fine 2 to 3 ft. plants, \$1.75 each; 3 for \$4.95.

BEAUTY BUSH

BEAUTY BUSH (Kolkwitzia). One of our most graceful flowering shrubs. Long, arching branches covered in early spring with masses of delicate pink, tubular flowers; attractive foliage and used widely in general shrub plantings. 18 to 24 inch plants, \$1.35 each.

OLD-TIME SWEET SHRUB

SWEET SCENTED SHRUB or CALYCANTHUS. The foliage is rich and flowers of a rich chocolate color, having delightful odor. The old fashioned shrub bush that used to be in every yard. 2 to 3 feet, \$1.25 each; \$3.45 for 3.

JAPAN QUINCE

JAPAN QUINCE (Cydonia japonica). An outstanding shrub of medium size with beautiful green foliage. The blooms are a brilliant scarlet red borne in profusion all over the plant. Blooms in early spring along with or just following Forsythia. Japan Quince is exceptionally pretty when planted with Forsythia or other shrubs or as a specimen plant. 18 to 24 inch, \$1.25 each; 3 for \$3.45.

JAPAN QUINCE

PEARL BUSH

PEARL BUSH (Exochorda Grandiflora). One of our grandest early white flowering shrubs; blossoms and leaf buds breaking forth at the same time the bush is completely covered with wax-white flowers resembling Mock Orange. Plant is very hardy. Blooming at same time as Forsythia its snowy white flowers make a contrast combination. 2 to 3 ft., \$1.50 each; 3 for \$4.25.

WHITE SNOWBERRY

WHITE SNOWBERRY (symphoricarpos racemosa). Beautiful rose-pink blossoms in July are followed by waxy white berries that are very ornamental all winter. This excellent, hardy, low-growing shrub does equally well in shady or sunny locations. 2 ft. size, \$1.95 each; 3 for \$5.50.

BUTTERFLY BUSH

BUDDLEA

Graceful Panicles of Magnificent Bloom
Outstanding Types in Three Colors

CHARMING. Magnificent long panicles of Rose Pink flowers cover this plant from early midsummer until frost, some panicles being 12 inches long. Very vigorous grower, good foliage and hardy in most sections. One of the best of recent introductions.

ILE DE FRANCE. The grandest of all purple types of Butterfly bush. Long tapering panicles borne in great profusion through the summer, dark blue with golden stamens presents a gorgeous sight.

ROYAL RED (New). Plants four to six feet high with deep leathery green foliage. Produces flowers from July until frost. Sprays of 2 foot length in a rich dark royal purple which intensify to almost red under artificial light.

All Butterfly Bushes

Heavy 2 yr., 2-3 ft. plants,
\$1.25 each; 3 for \$3.45.

CUSHION MUMS

A MOST BEAUTIFUL BORDER AND

BRONZE QUEEN — Bronze

Please state which color or variety wanted. Strong, well rooted single plants, \$.60 each; 5 for \$2.50; 10 for \$4.75.

Heavy, well branched clump plants, \$2.50 each.

CREPE MYRTLE

The Beautiful Lawn Shrub

Blooms throughout the summer with great clusters of delicately fringed flowers. Plants are hardy as far north as New Jersey. Crepe Myrtle is one of the slower growing shrubs, needs little pruning and is ideal for lawn planting.

Good type plants of red and pink, no variety, 2-3 ft. heavy grade for \$1.65 each; 3 for \$4.50.

Crepe Myrtle

NEW COLORS NEW VARIETIES

Firebird (TM). An exceptionally fine deep red. Holds color well and does not fade. Tall vigorous grower.

New Snow (TM). Heavy heads of white borne in profusion. A semi-dwarf grower with dense foliage.

Twilight (TM). Vigorous grower with heavy heads of dark purple flowers.

Pink Lace (TM). A medium grower with large heads of clear pink.

Price: Heavy 2-3 ft. plants, \$2.95 each. All four varieties, 1 plant each for \$10.95.

HYDRANGEAS

Varied Colors and Types in This Desirable Shrub

Oak Leaf Hydrangea. Best of the newer types of Hydrangeas. Upright to drooping in growth, attractive foliage. Compact large panicles similar to Hydrangea. P. G. which remain on the plant until September. Flowers changing in color. 18 to 24 inch plants, \$1.95 each; 3 for \$5.50.

Hydrangea (Paniculata Grandiflora). Flowers borne in huge panicles; light pink; changing to brown later in the fall; blooms in August and September. 18 to 24 inch plants, \$1.50 each; 3 for \$4.20.

WEIGELAS FOR BEAUTY

Outstanding Early Summer Blooms A sure hit with home owners everywhere

Weigela Eva Rathke. Flowers a brilliant crimson; a beautiful clear, distinct shade. 18 to 24 inch plants, \$1.25 each; 3 for \$3.45.

Weigela Rosea. An elegant variety with fine rose colored flowers appearing in June. 18 to 24 inch plants, \$1.25 each; 3 for \$3.45.

Java Red—a new low dense growing weigela with fiery red blooms. Very attractive and desirable. 15 to 18 inch, \$1.50 each; 3 for \$4.20.

Weigela

MOCK ORANGE

Fragrant - Beautiful

An outstanding addition to any shrub planting

Philadelphus, Virginiana (New). The finest of the new Mock Oranges. Very large, white, fragrant flowers. Blooms throughout the summer. 2 to 3 feet, \$1.30 each; \$2.85 for 3.

Glacier—A new Mock Orange with double white flowers that are highly scented. Plant is very hardy, a semi-dwarf, symmetrical and compact. 2 to 3 ft., \$1.95 each; 3 for \$5.50.

FORSYTHIA

One of the Earliest Bloomers Beautiful Flowers That Follow the Snow Outstanding for Hardiness

Forsythia Intermelia Spectabilis. Hardest of all Forsythias. Known as showy Border Forsythia. The

most profuse bloomer of all Forsythias, bush being covered with bright golden yellow flowers from base to tip of branches. Erect grower, its long branches drooping slightly. 2 to 3 foot bushes, \$1.25 each; 3 for \$3.45.

THE GLORIOUS SPIREAS

Among the best early bloomers for specimen clumps or hedge planting. Needs little attention. Has no enemies to destroy blooms or foliage.

Spirea Van Houtte (S. Van Houttei). This is the most popular of all the Spireas. Its gracefully arching branches heaped as they are with the white blossoms in spring. 2 to 3 ft., \$1.25 each; 3 for \$3.45.

New Improved Everblooming Spirea Billiardi. A new bright pink strain. Blooms a profusion of handsome spikes, which are most attractive and well adapted for cutting. Blooms entire season. 2 to 3 ft., \$1.75 each; 3 for \$4.95.

SNOWBALLS

Add Distinction and Beauty With One Of Our Oldest Shrubs GARDENIA SCENTED SNOWBALL (Viburnum Burkwoodii)

Here is an improved Viburnum Carlesii as fragrant as Carlesii, but blooms one to two weeks earlier. Flower heads up to four inches wide and 100 to 150 individual flowers. Semi-green. Growing 5 to 6 feet high. 18 to 24 inch, 2.25 each.

Snowball Common. The old-fashioned Snowball; pure white flowers are produced in May and June. Fine 2 to 3 ft., \$1.50 each; \$4.25 for 3.

Common Snowball

New . . . FRUITING-FLOWERING PEACH . . . New

Most Beautiful Flowers — Big Luscious Fruit

SATURN

Plant Patent 1485

(Grown and Sold Under License from Patent Owner)

Blooms showy masses of big double pink flowers—as showy as any regular flowering peach. Spring blossoms are followed by a crop yellow fleshed, freestone peaches ripening about with Halehaven. Flavor is extra fine. A good dual-purpose variety.

DOUBLE DELIGHT

Plant Patent 1787

(Grown and Sold Under License from Patent Owner)

A perfect companion for Saturn. It blooms later and ripens earlier. Blooms are a beautiful shell pink, lighter and more delicately colored than Saturn. Fruit is equally as large, yellow, freestone and somewhat sweeter than Saturn.

Prices for Saturn and Double Delight Trees Only
Stocky, well-grown 1 year trees, 3 ft. up, \$3.50 each.
Write for prices on larger quantities

DOUBLE FLOWERING PEACH

(Non-Fruiting)

DOUBLE RED FLOWERING PEACH . . . Most Hardy Profuse Blooming Type, most desirable for home use. Flowers are very double, almost like a small rose and present a striking appearance.

DOUBLE PINK FLOWERING PEACH . . . This is the pink counterpart of the famous Double Red Flowering Peach. It is hardy of plant and blooms profusely in early spring about the same time as the red ones do.

DOUBLE RED WEEPING PEACH . . . A recent selection of rare beauty. Blossoms are deep red and hang in ropes along the branches. Tree is a double weeper, seldom more than 6 ft. tall, very hardy.

Prices for Non-Fruiting Flowering Peach

	each	3	10
4 to 5 ft.	\$3.00	\$8.25	\$19.50
3 to 4 ft.	2.75	7.50	17.00
2 to 3 ft.	2.50	6.75	15.00

REDBUD PURPLE LEAVED PLUM

A fine new plum which holds a beautiful, rich red color throughout the summer. Redbud produces an abundant crop of completely edible fruit after flowering profusely each spring.

Prices same as for Non-Fruiting Peach

OUR BEAUTIFUL FLOWERING CRABS

SELECT FROM THESE OUTSTANDING VARIETIES . . . Ideal For Home And Roadside Planting

THE BEAUTIFUL HOPA CRAB

Exquisite rosy pink blossoms cover the entire tree—no other tree can equal the profusion of bloom of the wonderful HOPA. A beautiful tree from bloom to frost with red-tinged, dark green leaves and small red, rosy apples that cover the tree. Fruits can be used for jelly if desired. Tree spreads to about 15 ft.; 3 to 4 ft. and 2 to 3 ft. trees only.

ALMEY

THE SENSATIONAL NEW CRAB

Fiery Blossoms in the Spring . . . Bright Red Fruit in Fall

The tree upright, vigorous and hardy. Blooms second year. Flowers open from deep carmine buds, are large, star pointed and fiery crimson. One of the best new sorts.

BECHTEL'S DOUBLE FLOWERING CRAB

One of the most beautiful of the flowering crabs; tree medium size, covered in early spring with large, double, fragrant flowers of a delicate pink color.

HOPA CRAB

FRANKLINIA

The RARE FRANKLINIA

Beautiful blooms and blazing fall foliage bring beauty to any planting. Flowers start opening in Mid-August and continue to open until hard frosts. The young leaves are 5 to 6 inches long by about one-third as wide, a rich dark green with red veining. In Autumn the whole tree blazes a rich warm color. Produces a beautiful effect in any ornamental planting.

12 to 18 inch	\$2.45 each
18 to 24 inch	\$3.95 each
2 to 3 feet	\$4.95 each

THE BEAUTIFUL CLEMATIS

Strong Growers — Large Flowering

Order by Variety for Choice of Color

Duchess of Edinburgh	white
Jackmania	purple
Lord Neville	purple
Comtesse Bouchard	pink
Crimson Star	red
Ernest Markham	red
Ramona	blue to lavender
Paniculata	blue (small)

All are 2 yr. No. 1 plants - 4" pots individually wrapped, at \$1.95 each

PURPLE WISTERIA. Flowers light purple and blue in early spring, borne in large drooping clusters. Well adapted for arbor plantings. Prices, 2-yr. grafted plants, \$1.95 each; \$5.50 for 3.

SILVER LACE VINE. A quick growing climbing vine that can certainly be recommended for its thriftiness and beauty. The foliage is heavy and it is literally covered with white silvery blossoms from early August until late fall. \$1.50 each, 3 for \$4.20.

LARGE FLOWERING CLEMATIS

THE WILD ROSE LIVING FENCE

(ROSA MULTIFLORA JAPONICA)

Needs Little Pruning — Disease Free — A Living Fence For Years To Come.

Multiflora Roses are being used effectively to decrease soil erosion, dividing line fences, wind breaks, screens for unsightly objects, to confine farm animals and as snow fences in winter.

The plants grow rapidly in most all types of soil and produce a fence up to eight feet in height in three to four years, then it stops, getting no taller. The fence needs no pruning or care after the initial setting.

Where a close hedge or screen is desired, we suggest planting one foot apart. For more open hedge they may be planted two or three feet apart in a single row.

The fence is a beautiful sight in bloom putting on a gorgeous display for about two weeks. Thereafter seed pods are formed to furnish food for the birds.

Prices:

Jumbo, branched 18" up: 10 plants \$2.50; 25 plants \$4.50; 50 plants \$8.30; 100 plants \$15.00; 500 plants \$60.00.

Strong vigorous 12 to 18": 25 plants \$2.25; 50 plants \$4.15; 100 plants \$7.50; 500 plants \$30.00.

Light, 6 to 12": 25 plants \$1.50; 50 plants \$2.60; 100 plants \$3.95; 500 plants \$18.00.

BEAUTIFUL COLOR—VIGOROUS GROWTH—A "MUST" TREE IN EVERY YARD

WHITE DOGWOOD

(*Cornus florida*)

The white dogwood is one of nature's prettiest plants. The flowers appear early and persist until leaves are formed. Foliage is green through the summer, turning red in fall. Scarlet fruits are abundant and beautiful from late summer until frost. Mixed plantings of white and pink dogwoods are very effective.

Prices listed are for thrifty, bare root plants:

	each	3	10
3 to 4 ft.	\$2.50	\$6.75	\$20.00
4 to 5 ft.	3.00	8.25	25.00

All sizes of White and Pink Dogwoods are available Balled and Burlapped. Add 50¢ for this service.

PINK DOGWOOD (*Cornus florida rubra*)

A colored form of the native species Dogwood. It has the same habit of growth, period of bloom, and general behavior. Pink dogwoods are adapted to most of the central and northern areas and are a beautiful addition to any garden. They have bright deep rose colored blossoms which come in the early spring and last about two weeks. The foliage is a nice green which becomes a handsome red in the fall.

Prices listed are for thrifty, bare root plants; 3 to 4 ft. plants and up are budded and ready to bloom.

	each	3	10
18 to 24 in.	\$2.75	\$ 7.50	\$22.50
2 to 3 ft.	3.50	9.75	30.00
3 to 4 ft.	4.50	12.75	40.00
4 to 5 ft.	6.00	17.25	55.00

"CHEROKEE CHIEF" DOGWOOD

Red Flowering

A new fully red, budsport of famous pink dogwood that has been fully tested and widely grown with success. They are beautiful as specimen plants and in group plantings.

2 to 3 ft., bare root: \$4.95 each — 3 to 4 ft., bare root: \$6.95 each

"CLOUD 9" DOGWOOD

White Flowering

This newest of all white dogwood varieties is ideal for most plantings. "Cloud 9" has very large and regular blooms and flowers at a very early age. It is not unusual for 1 year plants to be covered with blooms. Plant "Cloud 9" for blooms next year.

18-24 inch, bare root: \$3.95 — 2 to 3 ft., bare root: \$5.50

"CHEROKEE PRINCESS" DOGWOOD

White Flowering

A new completely white dogwood which has the fine characteristics as regular *Cornus florida*. Blooms are larger and more prolific. A very dependable variety.

2 to 3 ft., bare root: \$3.75 — 3 to 4 ft., bare root: \$5.95

Flowering Cherries

Upright Types

KWANZAN. Large double pink blossoms borne in profusion. Tree vigorous and upright in growth.

MT. FUJI. The very best white flowering cherry. We have never seen such clusters of snow-white double blossoms as this tree bears in the spring. Trees upright in growth but droops naturally when in bloom.

Prices upright Tree Form, Double Flowering Cherry (blooming size trees) 4 to 5 ft., \$5.95 each.

WEeping DOUBLE FLOWERING CHERRY

Flowers are large double brilliant pink, borne in clusters with stems about 1 inch long. Blooms later than the Single Flowering type and about the same time as other double flowering cherry, being partly in leaf when blooms appear. A grand sight to behold when in full bloom. Well developed heads on 5 to 6 ft. stems, \$9.95 each.

The Beautiful Magnolias

MAGNOLIA SOULANGEANA and **MAGNOLIA NIGRA**, the best known of the deciduous Magnolias. Perfectly hardy and very beautiful plants when in bloom. Blossoms are large purplish-pink and usually appear just before the leaves come out. The Nigra type flowers are dark purple on outside. 18 to 24 inch, \$2.95 each; 24 to 30 inch, \$3.95 each; 30 to 36 inch, \$4.95 each; 3 to 4 ft., \$5.95 each.

MAGNOLIA STELLATA (The Starry Magnolia). A distinct and charming slow growing magnolia. Blooms before foliage appears. Flowers pure white, semi-double

and fragrant. A profuse bloomer and very attractive. 2-3 ft. plants, \$3.95 each; 18 to 24 in. \$2.85 each.

MAGNOLIA GRANDIFLORA. The great evergreen, large flowering Magnolia of the South and Central areas. The most beautiful of all evergreen trees; its immense saucer-like, white shading to cream and very fragrant flowers present a striking appearance contrasted with the large glossy green leaves. Not hardy north of southern New York. 18 to 24 inch, \$4.50 each; 2 to 3 ft., \$5.95 each; 3-4 ft., \$6.95 each.

SHADE TREES

Don't Wait Any Longer . . . Start Your Own Shade Today

At These LOW PRICES

Red Maple

High Color Spring & Fall

This fine fast growing tree gives red color in early spring and brilliant red colored leaves in the fall. It does exceptionally well on wet ground. 6-8 ft. branched trees, \$6.50 each; 8-10 ft., \$8.50 each.

Norway Maple

Best Medium Tree For Lawns

A large, handsome tree with broad, deep green foliage; has a very compact growth. A valuable tree for parks, lawns or streets. 6 to 8 feet, \$6.75 each; 8 to 10 feet, \$8.50 each.

Very Fast Grower

(A. Dasycarpum). A rapid growing tree of large size; irregular rounded form; foliage bright green above and silver beneath; a favorite street and park tree. 6 to 8 feet, \$4.75 each; 8 to 10 feet, \$5.75 each.

Crimson King Maple

Best All Red

See Full Description on Page 59

European White Birch

Unequaled For Beauty

Offered In Clumps or Single Stems

WHITE BIRCH CLUMPS (European). Same as regular White Birch except grown in clumps of 3 or more stems from a main stem at ground level. Produces very beautiful effect and very desirable for screen planting. 3-4 ft., 3 or more stems, \$3.95 each; 4-5 ft., 3 or more stems, \$4.95 each.

BIRCH WHITE (European). Erect growing branches slightly drooping and attractive bark which is almost white. 4 to 6 ft., \$2.95 each; 6 to 8 ft., \$4.75 each; 8 to 10 ft., \$5.75 each.

CUT LEAF WEEPING BIRCH. A slender tree with white bark, gracefully drooping branches, fern cut leaves which are dark green. One of the most beautiful weeping trees known. 6 to 8 ft. specimen trees; \$5.95 each.

Lombardy Poplar

Fine For Screen and Seashore Use

Grows to an immense height. Used for roadside planting or to break the monotony of low, round-top trees. Also beautiful as a screen or windbreak. 6 to 8 feet, \$2.25 each.

NOTICE—All prices listed are for bare root, dormant trees. Please ask for quotations on B & B landscape material.

Sweet Gum

Beautiful Fall Color

Sometimes called the Star tree. A beautiful symmetrically shaped tree. The corky-ridged bark of the branches and large limbs, present a unique appearance. Leaves are bright green changing to a pleasing tone of crimson in the autumn. 4 to 5 ft., \$4.25 each; 5 to 6 ft., \$5.50 each.

Moraine Locust

(Plant Patent No. 836)

Fast Growing Honey Locust

We bring to our patrons another fine shade tree. The Moraine Locust is an Improved variation of the Honey Locust with a round head when young but tall and vase shaped when older, attaining a height of about 80 feet. A stately specimen tree of tidy habits. The dark green, lacy foliage allows some sunlight to filter through and grasses do well under the tree. A new, fast growing, disease resistant shade tree you can enjoy wherever planted. 5 to 6 feet, branched, \$6.00 each; 6 to 7 feet, branched, \$7.50 each; 7 to 8 feet, branched, \$9.00 each.

Elms

Graceful — Fast Growing — Disease Resistant

CHINESE ELM—Tree upright, extreme ends of branches drooping, very dense, making good shade. Fast growing and resistant to disease, drought and cold. 5 to 6 ft., \$3.25 each; 6 to 8 ft., \$4.75 each; 8 to 10 ft., \$5.75 each.

HYBRID BROADLEAF ELM—A proven grower of the Elm family that is very vigorous. Leaves are much broader than Chinese Elm and trees are much cleaner. A very disease resistant and fine new plant. 6 to 8 ft., \$5.75 each; 8 to 10 ft., \$6.75 each.

Willows

WISCONSIN WEEPING WILLOW—The well-known green weeping willow. It makes a large tree covered with heavily drooping branches. 6 to 8 ft. branched trees, \$4.75 each.

NIOBE WEEPING WILLOW—The famous Yellow-barked willow that has large drooping branches covered with narrow, silvery green leaves. Very attractive. 6 to 8 ft. trees, \$4.75 each.

HOLLAND BULBS

Very special varieties of Gladiolas, Dahlias, Begonias, and Lilies for Spring planting. Tulips, Hyacinths, Crocus, Daffodils, and Narcissus for Fall Planting. Send for Free Price List.

CHINESE HOLLIES

FEMALE CHINESE HOLLY

(*I. cornuta femina*)

Another Chinese holly which bears large berries and has excellent foliage. Leaves are larger and more spiny than Burford. Plants tend to spread more than Burford and seem more hardy. Excellent for specimen and foundation planting.

BURFORD HOLLY

(*I. cornuta burfordi*)

A Chinese holly of extreme merit. Large red berries, very glossy green foliage. Generally has only one spine on each leaf. A very fine variety for foundation, specimen, or hedge planting.

DWARF CORNUTA HOLLY

(*I. cornuta rotunda*)

A fine dwarf, slow growing form of the Female Chinese Holly. Has all other fine features of regular type. Dwf. cornuta holly is excellent for use in quality landscape design.

DWARF BURFORD HOLLY

This new selection has the same fine berry and leaf characteristics as regular Burford. In size, it is a definite dwarf growing only to about 3 ft. Dwf. Burford is a rather slow and compact grower making it most adaptable to many confined locations. Hardy.

Extra heavy plants in 1 gal. cans: \$2.95 each; 2 for \$5.50; 4 for \$9.95.

JAPANESE HOLLIES

CONVEX LEAVED HOLLY

(*I. crenata convexa*)

An excellent shaped Japanese Holly that grows broader than tall, has small convex shaped leaves, and small black berries. A fine plant for hedges, foundation planting. A very hardy type.

DWARF JAPANESE HOLLY

(*I. crenata helleri*)

This very compact, low growing form is known everywhere as Helleri. It has very small leaves, no fruit, and is very useful for window boxes, planters, foundation planting, and rock gardens.

HETZ JAPANESE HOLLY

(*I. crenata hetzi*)

Very similar to Ilex Convexa, but having larger leaves, much greener foliage, and somewhat larger mature size. A most handsome and hardy plant that produces black berries.

SMALL LEAVED JAPANESE HOLLY

(*I. crenata microphylla*)

This, most hardy of all Japanese types, is a rather upright grower. It has small leaves that are pointed and dark green. Microphylla is fine for hedges, foundations, and as a substitute for boxwood.

ROUNDLEAF JAPANESE HOLLY

(*I. crenata rotundifolia*)

Sometimes called Boxwood Holly, *I. rotundifolia* is a very popular form for most all uses. Foliage is deep green, with large round leaves. It is a vigorous grower, very hardy, and useful for foundation planting and hedge work.

Convex Leaved Japanese Holly

Extra heavy plants in 1 gal. cans: \$2.95 each; 2 for \$5.50; 4 for \$9.95.

ENGLISH HOLLIES

AQUIPERNYI BRILLIANT

(Female)

A cross of English and *I. pernyi* which has good foliage, bright red berries, and good vigor. A different type of holly that should be included in any holly planting. It can be pollinated with Male English plants.

VARIEGATED ENGLISH HOLLY

(Female)

A very showy and beautiful holly that produces red berries. Foliage is a glossy green with cream colored margins. Hardy wherever other English Holly is grown.

ENGLISH HOLLY

(Female)

Ilex aquifolium—better known as Oregon holly in this area. It is vigorous, quite glossy, produces large red berries and is hardy to Cape Cod. Makes finest of Christmas decorations.

ENGLISH HOLLY

(Male)

This is the same as the female plant in appearance, but does not produce any berries. Male plants must be included in English Holly plantings at the rate of 1 to 10 for good fruiting.

Extra heavy plants in 1 gal. cans: \$3.50 each; 2 for \$6.50; 4 for \$11.95.

Variegated English Holly

NEW EXOTIC GARDEN HOLLIES

(*Ilex aquifolium* X *Ilex cornuta*)

NELLIE STEVENS—A fine, vigorous variety that is hardy. Leaves are more glossy than on English kinds and more spiny than Chinese kinds. An excellent type for use as a specimen. Berries are brilliant red and come at an early age.

DR. KASSAB—Another fine variety somewhat less vigorous than Nellie Stevens making it more useful for screen and general landscape work. A very hardy, red berried holly.

LYDIA MORRIS—This hybrid is similar to Dr. Kassab but foliage is somewhat lighter in color. Bright red berries make a striking appearance. Plants are hardy and suitable for all uses except foundation planting.

Extra heavy plants in 1 gal. cans: \$2.95 each; 2 for \$5.50; 4 for \$9.95.

Nellie Stevens Holly

THE BEAUTIFUL NANDINA

Showy Red Berries Last All Winter

NANDINA DOMESTICA. (Heavenly Bamboo). One of our finest Berried Evergreen plants. A very showy shrub of medium height with large cluster of small red berries in the autumn. Its dark green foliage assumes a gorgeous orange red or crimson color in winter. Thrives well in any well-drained loamy soil and is very hardy. One of the plants which is used in all the better class of landscape work.

18-24 inch, \$3.50; 12-18 inch, \$2.50

Abelia Grandiflora

PYRACANTHAS

NATURE'S SHOWPIECE

Evergreens of Outstanding Beauty

PYRACANTHA C. LALANDI (Firethorn). The most hardy of all Firethorns. It is an upright grower with white flowers in summer and large highly colored, orange berries from late summer to late winter. Firethorns should be pruned annually for increased berry production. They thrive on any well drained fertile soil.

12 to 18", \$1.95; 18-24", \$3.50; 2-3', \$4.75; 3-4' \$6.25.

RED BERRIED PYRACANTHA. There are many types of the red berried pyracantha being offered and we have selected the most hardy type we have observed. However, they will not stand zero temperatures. The red berried type is more spreading than the Lalandi. The clusters of bright, large, red berries contrasted with glossy, evergreen foliage surely presents a striking appearance. A beautiful sight when planted alone and in combination with other pyracanthas or other shrubs.

12-18 inch, \$1.95; 18-24 inch, \$3.50; 2-3 ft., \$4.75.

ABELIA GRANDIFLORA

(Bush Arbutus)

Foliage dark green, glossy, its arching branches have a distinct shade of red. From May until frost this plant is covered with pinkish-white bell-shaped flowers. 12 to 18 inch, \$1.25 each; \$11.00 for 10; 18 to 24 inch, \$1.95 each; \$17.50 for 10; 2 to 3 feet, \$2.50 each; \$22.50 for 10.

All Prices for Bare Root Plants.

LARGE SIZE AND SPECIMEN PLANTS

We have a nice supply of most all varieties listed in this catalog in large size, specimen plants suitable for landscape work. Because shipping and packing costs are prohibitive, we have not included them in our listings. Please write us for prices on such material or visit with us and look over our very complete line. You will find many other plants, not listed here, for your enjoyment.

HARDY EVERGREENS

LANDSCAPE SIZE PLANTS

All plants in this group will be shipped with a ball of earth by Express or Motor Freight because of size and weight. We urge you to stop at the nursery to pick up any Landscape Size Plant if at all possible.

Spreading Yew

JUNIPER

PFITZER JUNIPER (*J. pfitzeriana*). Very hardy, valuable spreading variety with silvery color. 12 to 18 inch, \$3.75; 18 to 24 inch, \$4.75; 24 to 30 inch, \$5.95.

JUNIPER GLAUCA HETZLI. A spreading type evergreen, decidedly blue, rapid in growth, stands shearing well, closely resembles the Pfitzeriana in appearance and growth habits. 12 to 18 inch, \$3.50; 18 to 24 inch, \$4.50; 24 to 30 inch, \$5.75.

SHORE JUNIPER (*J. conferta*). A prostrate spreader with light green foliage. It is salt and sun tolerant—excellent for seashore. Shore Juniper is also good for a ground cover on steep grades or loose soil. Heavy plants in 1 gal. cans, \$2.95 each; 2 for \$5.50; 4 for \$9.95.

Hicks Yew

YEWS

HICKS YEW (*Taxus m. hicksii*—upright). A distinct columnar form with upright branches with radially spread leaves. Not as compact as the Irish Yew. 18 to 24 inch, \$5.50 each; 24 to 30 inch, \$6.00 each; 12 to 18 inch, \$3.95 each.

BROWN'S YEW (*Taxus m. brownii*). A extra fine oval shaped yew of the media type that blends well with other yew and holly plantings. Low, dense growth makes this a fine addition to our yew list. 12 to 18 inch plants, \$4.75; 18 to 24 inch, \$5.75.

JAPANESE YEW (*Taxus cuspidata*—spreading). One of the hardest of Yews. Bushy, upright, spreading nature with rich green foliage, well suited for foundation planting. 12 to 18 inch, \$4.75 each; 18 to 24 inch, \$5.75 each; 24 to 30 inch, \$6.75 each.

CAPITATA YEW (*Taxus, c. capitata*—pyramidal). An upright form of the famous and popular *Taxus cuspidata* or spreading yew. The upright growing habit of this plant makes it extremely good for interplanting with the spreading types in foundation plantings. Foliage dark green and thrives in sun or shade. 12 to 18 inch, \$4.95 each; 18 to 24 inch, \$6.25 each; 24 to 30 inch, \$7.50 each.

DENSE SPREADING YEW (*T. c. densiformis*). A fine new spreading yew similar to regular Jap. Yew except that it is much denser in growth. Foliage is very green and vigorous. 12 to 18 inch plants, \$4.75 each.

Grow-Size Plants for More Economy

These plants are available in mailable sizes. They are very healthy, vigorous, and ready to plant. Grow-size plants are excellent for folks with limited landscaping budgets.

The plants listed below are available in mailable sizes—either in 1 gallon cans or small balls of earth. They are semi-finished plants which will make a fine showing for many years. Grow-size plants will make that limited budget look many times larger. Truly fine plants at Economy prices.

Pfitzer Juniper	Japanese Yew
Glaucia Hetzi Juniper	Hicks Yew

(We cannot make any replacements on these seedlings if they fail to grow. All plants are taken freshly from the soil and good counts are given).

NEED LARGER PLANTS? Most of the varieties listed above are available in larger sizes. Landscape grades of Scotch Pine, White Pine, Norway Spruce, Canadian Hemlock, Douglas Fir, American Arbor Vitae, and Colorado Blue Spruce can be supplied in limited quantities. Prices and sizes will be quoted on your needs.

We are pleased to show here samples of our Fine Rooted, High Quality Evergreen seedlings. Those pictured on the left are Norway Spruce. Those on the right are Scotch Pine. Both are favorites for Christmas Trees and many other uses.

Our landscape department will be glad to discuss your individual needs and help plan your homesite for beauty and utility.

May We See You Soon?

CRIMSON KING MAPLE

Plant Patent No. 735
BEAUTIFUL COLOR — VIGOROUS GROWTH
A "MUST" TREE IN EVERY YARD

This is the real red maple you have been waiting for. It is a beautiful form of the Schwedler Maple with intense red foliage throughout the growing season. Unlike other red maples, the color of the Crimson King does not fade as the summer progresses. This fine tree originated in Europe and has been under observation in this country for many years. We know it is adapted to our soils and climates, that it is perfectly hardy, and that it can be grown in most any location. Crimson King is truly a "TREE OF BEAUTY." See color illustration on cover. 4 to 5 ft., \$4.95 each; 5 to 6 ft., \$5.95 each; 6 to 7 ft., \$6.95 each.

BLUEBERRIES DELICIOUS — DECORATIVE (See Pages 40-41)

An outstanding plant for hedges, screens, or foundation work. Beautiful foliage in summer, exceptionally pretty red stems in winter, resistance to cold and disease make blueberries very popular. Best of all are the large, delicious fruits you harvest from your own yard. DON'T WAIT—Order your plants now.

An arrangement using The New
Fan Tail Willow

Japanese Fan Tail Willow

(*Salix sachalinense* Sekka)

This is a strange, Japanese-y plant that's straight from the Orient and as crooked as can be . . . the willow that doesn't know which way it ought to grow. It will be the most talked about plant in your garden. A medium spreading shrub that's fluffy with soft, silvery catkins in the spring, and attractive all summer dressed in long, narrow, shiny, green leaves, this mad willow in the fall becomes a home decorator's delight. It is then, when the branches are fully ripened, that their odd twistings and turnings provide for even the inexperienced arranger the most arty of Japanese-style decorations. Sometimes the branches are flat and an inch or so wide, sometimes they're round—always they grow in the most unexpected direction; and they grow that way *naturally*—without the aid of human hands. Spring, summer and fall in the garden—and all winter in the house—you'll appreciate the unusual beauty of this mysterious, odd-ball plant . . . *Salix sachalinense* Sekka.

Heavy 2 yr. field grown plants, 15 to 18 inches: \$2.95.

Use STRAWBERRIES for Ground Cover

Yes . . . Use Strawberries for a lasting and fruitful Ground Cover. Utilize the space around your home plantings to give beautiful foliage and delicious fruit. Strawberries are so easy to grow—they easily adapt themselves to a wide range of soils and fertility—that we know you will be amazed at your success. Strawberries, when used for Ground Cover, may be grown by the Hill System or Matted bed culture. You may use either one season or ever-bearing varieties. (We have special cultural directions for either method free upon request).

Big, Luscious, Red Strawberries are yours for the picking if you start your Ground Cover Patch this season. Plant Everbearing Types this spring for plenty of fruit next fall. Select your choice from our complete list in the main Strawberry Section, pages 42-47.

NEW ROBIN HOOD ROSE

Good Dense, Almost Carefree Rose Hedge — Beautiful Cherry Red Blooms

Robin Hood is the most remarkable and beautiful Hedge Rose ever offered. It is a delightful Musk Rose that has everything: Blazing clusters of brilliant cherry red flowers completely cover the healthy, deep green foliage in the spring. It continues to bloom throughout the summer and into the fall. For small or large gardens, these densely compact plants are unexcelled. Robin Hood can be trained and sheared to most any desired size and form.

Do not confuse the Robin Hood with other red rose hedges on the market. Our plants are genuine. Plant 12 to 18' apart for good results.

Prices for strong flowering plants:

4 for	\$ 3.60	30 for	\$24.00
8 for	6.95	60 for	45.00
16 for	13.50	100 for	65.00
